

1869.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT FROM TRUSTEES, FOR 1868.)

Presented to Parliament, pursuant to Act 17 Vict., No. 2, sec. 9.

REPORT OF THE TRUSTEES OF THE AUSTRALIAN MUSEUM, FOR THE YEAR
ENDING 31st DECEMBER, 1868.

To HIS EXCELLENCY THE GOVERNOR-IN-CHIEF,
&c., &c., &c.

1. The Trustees of the Australian Museum have the honor to submit to your Excellency this their Fifteenth Annual Report.

2. The Museum has been open to the public daily (Sundays excepted) during the past year, and has been visited by 108,727 persons.

3. The system of exchanging specimens of Natural History with the principal Foreign Museums is still maintained by the Trustees, who have received several valuable collections during the past year, a list of which is appended. (*Appendix No. 2.*)

4. Numerous donations have been received during the year, a list of which is appended. (*Appendix No. 3.*)

5. In Appendix No. 4 will be found a list of the various objects sent in exchange, together with the name of the recipients.

6. Several valuable works, purchased out of the Endowment Fund, have been added to the Museum Library, a list of which is appended. (*Appendix No. 5.*)

7. Two Taxidermists have been occupied during the year in preparing and mounting the following specimens:—

16 mammals,
195 birds,
10 reptiles,
12 skeletons of various animals,—

and in cleaning and preserving from decay the collection already displayed for public inspection.

8. The Trustees have again to draw attention to the fact that the first edition of their Catalogue is out of print, and that a second enlarged edition is urgently required; and as the Endowment Fund is much encroached upon already for the purchase of the necessary books and periodicals, they are not in a position to proceed with the printing. Under these circumstances, the Trustees recommend that application be made to have a sum put on the Estimates sufficient to cover the expenses of printing. The Trustees believe that if this was done for a few years, a publishing fund could thus be raised, which would cover the expenses of so desirable an object.

9. The new wing has been open to the public since January, and the number of visitors has largely increased, from 11,300, in 1860, to more than 100,000 persons during the past year. The collection is also much larger, in better condition, and far more valuable than it was previously; but to keep the specimens in this state, to prevent damage, and maintain order among the increased number of visitors some additional funds are urgently required.

10. The Assistant Curator, Mr. George Masters, has departed for West Australia, and collected already some valuable and interesting specimens, a list of which is appended. (*Appendix No. 6.*)

11. *Appendix No. 1* contains an abstract of the receipts and payments of the Trustees on behalf of the Museum, for the year ending 31st December, 1868.

12. *Appendix No. 2* contains a list of the specimens received in exchange.

13. *Appendix No. 3* contains a list of the various donations during the year, with the names of the donors.

14. *Appendix No. 4* contains a list of the specimens sent in exchange to various persons and institutions.

15. *Appendix No. 5* contains a list of the books purchased for the Museum Library.

16. *Appendix No. 6* contains a list of the specimens collected by Mr. George Masters, Assistant Curator.

17. The Trustees have the honor to submit this their Report for the year 1868; and in testimony thereof, have caused their Corporate Seal to be hereunto affixed, this third day of June, 1869.
