1926. (SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(ANNUAL REPORT OF THE TRUSTEES FOR THE YEAR ENDED 30th JUNE, 1926.)

Presented to Parliament pursuant to Act Ao. 61, 1902, Sec. 10.

Printed under No. 7 Report from Printing Committee, 29 November, 1926.

To HIS EXCELLENCY THE GOVERNOR,-

The Trustees of the Australian Museum have the honour to submit to your Excellency their seventy-second report, being for the year ended 30th June, 1926.

1. TRUSTEES.

The Trustees report with great regret the death on 15th May, 1926, of Mr. J. J. Fletcher, M.A., B.Sc., a member of the Board since 3rd September, 1920. Mr. Fletcher's great knowledge of natural history in the widest sense was of the utmost service to the Trustees, and his less is deeply felt. On the 3rd July, 1925, Dr. C. Gordon MacLeod and Mr. G. M. Blair were elected in place of Hon. D. Levy, M.L.A., and the late Dr. Eric Sinclair.

Dr. T. Storie Dixson did not seek re-election as President this year, and Mr. E. Wunderlich, F.R.A.S., was elected President in his place.

Mr. A. H. Chesterman, Surveyor-General and Chief Surveyor, retired from that office on 6th December, and was succeeded by Mr. H. F. Hall, who retired on 14th June, 1926; he was succeeded by Mr. H. B. Mathews on 15th June, 1926.

A list of the Trustees, with a record of their attendances at Board meetings, is shown in Appendix A. Eleven ordinary and three special meetings were held during the year.

Three sectional committees, elected yearly in December, meet monthly and make recommendations on matters coming within their purview. The House Committee deals generally with all questions affecting the staff, and such matters as structural improvements and additions. The Scientific and Publication Committee controls the scientific publications of the Museum, acquisition and exchange of specimens and publications, and lectures delivered in the Museum. The Finance and Publicity Committee supervises the finances of the institution, the publication of the Australian Museum Magazine, controls extension lectures, and devises measures for the purpose of popularising the Museum and making its contents and educational advantages better known to its owners—the public.

In addition, special committees are appointed from time to time to deal with specific questions.

A list of members of these committees and their attendances is shown in Appendix B. The President is ex officio a member of each committee.

2. President's Address, 1925.

Various matters stressed in the President's address of February, 1925, were referred to a special committee of the House Committee. This committee held ten meetings and made an inspection of the offices, library, and storeroom. The reports arising from the deliberations of this committee are still under consideration.

*21527 170-A

3. Rules and Orders.

The revision of rules and orders was completed during the year, and now awaits confirmation by the Governor. The Trustees have adopted amended staff instructions, which became operative on 1st January, 1926.

4. GUNNAMATTA FISH HATCHERY.

By the permission of the Chief Secretary, the State fish hatchery premises at Gunnamatta Pay, Port Hacking, have been used on various occasions by members of the Museum staff. The results in collections and observations have been so encouraging that the Trustees have under consideration the possibility of obtaining from the Government a lease of these premises, which offer considerable advantages as a marine biological station.

5. Post-cards.

The Trustees have decided to issue a special series of post-cards, and designs of subjects are being executed by Mrs. T. Iredale. The initial issue will consist of 6,000 post-cards of each kind, these being contained in sets of five in a special envelope with a booklet explanatory of each subject. These will be available to the public in the galleries and at booksellers and newsagents. It is confidently anticipated that the undertaking will be a pronounced success, and that its educational value will be considerable.

6. STAFF.

The death of Allan R. McCulloch, which took place at Honolulu on 1st September, was a severe loss to the Museum. He had been in the service of the Trustees since July, 1898, and was recognised as one of the foremost workers in systematic ichthyology. His health had been unsatisfactory for a considerable period, and at the time of his death he was on long leave, granted him by the Trustees in the hope that it would be restored.

The vacancy thus caused in the ichthyological section was filled by the promotion of Mr.G.P. Whitley, who had been assisting Mr. McCulloch since April, 1922, and had been given charge of the section during the absence of his senior.

The appointment of Mr. Tom Iredale, temporary assistant in conchology since 1st April, 1924, was made permanent on 4th September, 1925.

In Appendix C is shown a list of the staff as at 30th June, 1926. For a list of the honorary staff, see Appendix D.

7. BUILDINGS AND GROUNDS.

The wooden flooring in the main (front) hall and in the bird and reptile gallery has been sand-papered and wax polished, and a much brighter appearance has resulted.

The Trustees have under consideration schemes to effect an increase in show space and improved lighting in the mineralogical gallery, to erect a gallery for storage purposes in the Conchologist's room, and to improve the ventilation of the lecture hall.

Repairs and maintenance received due attention during the year. An examination of the storage sheds at the back of the Museum building showed that white ants have made inroads on the woodwork. Suitable action was immediately taken. The Town Planning Association protested against the continued existence of these unsightly structures. The Trustees agreed with the views expressed and feel that it is

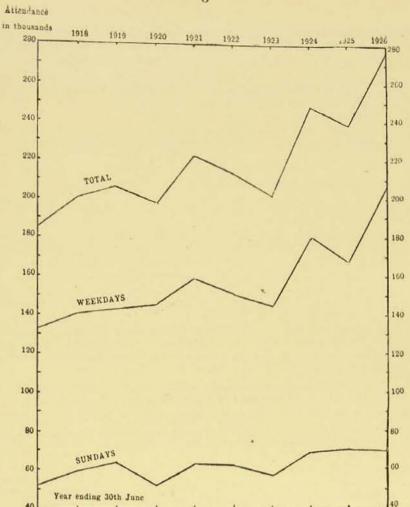

The re-grading of William-street by the City Council has resulted in a reduction in height of the Museum retaining wall. The gateway leading from William-street will require alteration and adjustment, and the private roadway therefrom will have to be regraded.

8. ATTENDANCE OF VISITORS.

The number of visitors during the year is the largest on record. This results partly from the resolution to open the Museum to the public on Mondays, which took effect from July, 1925, the Monday attendances for the twelve months totalling 39,255 (including visitors on Monday public helidays).

Statistics of attendances for the years 1916 to 1926 :—

1916-1917 (1s	st July to	30th Ju	ne)	***	***	Week-days, 133,645	Sundays. 52,399	Total. 186,044

Magazine.—The Museum Magazine maintained its popularity as a scientific journal, 1 arts 7, 8, 9, 10 of Volume II being published during the year.

The Trustees availed themselves of the offer of Messis. Angus und Robertson Ltd. to take charge of the distribution of the Magazine to the trade and subscribers; this resulted in a certain stimulus being given to the publication. At the same time it is realised that a greater support should be given by the general public to this interesting and educative medium.

Post-cards.—The committee's recommendation to the Board to publish a series of illustrated post-cards was adopted, and the work of publication of the approved series is well advanced.

Publicity.—The Trustees decided upon accepting the offer of the Commissioners for Railways and Tramways for the gratis display of a coloured show card in the trans. A design was approved and a supply of 500 cards was duly released. The thanks of the Trustees to the Commissioners have been recorded.

Throughout the year the Press has readily assisted the Trustees by giving publicity to many matters of public interest arising from Museum work and activities, and the Trustees fully appreciate the services of the various newspapers in this connection; in like sense the Trustees thank the Editors of "Building Magazine" and of "The Education Gazette" for special articles.

Donations.—Although the Museum continues to receive many welcome and valuable additions to its collections by way of gifts, very little financial assistance has been rendered it in the form of donations.

Only by frequent gifts of both specimens and money can the Museum hope to retain its place among the progressive institutions of the world.

The inadequate provision of funds in the past by way of State grant is a severe handicap not only in the matter of purchases of collections, but also in such important items as field observation work and collecting and the inauguration of a Children's Museum. It may, however, be mentioned that a special grant of £200 was made available by the Honourable the Minister to enable the Trustees to purchase a valuable collection of fossils, the property of Mr. Varney Parkes.

The grateful thanks of the Trustees is here recorded for amounts donated by the following public-spirited citizens: Sir Hugh Denison, £25; Sir Arthur Rickard, £25; Sir Samuel Hordern, £25; T. E. Rofe, Esq., £25; O. Phillips, Esq., £20; Anthony Hordern, Esq., £35; V. Molesworth, Esq., £1 1s.

 ${\it Museum\ Needs.} {\it --} {\it The\ Trustees\ again\ take\ the\ opportunity\ of\ stressing\ what\ are\ really\ urgent\ needs\ in\ the\ following:--}$

The completion of exhibition galleries.

The removal of existing temporary storage sheds and their replacement by permanent fire-resisting structures.

Additional endowment funds for the furtherance of research and educational work.

Benefactions and bequests from public-spirited citizens of this State.

Exhibits.—Considerable improvement in the public galleries has been effected during the year; details will be found in reports dealing with the various sections, but special mention may be made of the following:—

Three aboriginal figures presented by Mr. E. Wunderlich, Trustee, have been installed. The figures were modelled from life by Mr. G. Rayner Hoff and represent an adult man of athletic build in the act of throwing a boomerang, while a woman and a boy watch the result of the throw.

The "ravi" was encased in order to protect the exhibits from dust and from the danger of fire. The cost of constructing the case was largely defrayed by donations received from Sir Hugh Denison, Sir Samuel Hordern, Sir Arthur Rickard, Mr. T. E. Rofe, and Mr. Orwell Phillips, whose generosity is heartily acknowledged by the Trustees.

The exhibited series of birds has been completely overhauled and rearranged with a notable increase in display effect.

The lion group was improved, particularly as regards lighting, and a commencement was made in the overhaul of the exhibited series of mammals, the ungulate section and the Australian Muridae having been rearranged.

In the paleontological section a large series of specimens descriptive of the skeleton of the extinct horned tortoise Meiolania has been put on view.

Field Work.—A considerable volume of field work has been accomplished during the past year.

Three trips by Mr. W. W. Thorpe to the Newcastle and Maitland districts yielded a number of aboriginal skulls and skeletons and a large series of very interesting flaked implements. Mr. Thorpe also did some excavation work and obtained a number of specimens from aboriginal shelters at Woolwich and at Gore Creek, Lane Cove River.

The Director and Mr. G. C. Clutton visited the Wellington Caves, which have yielded the fossil remains of marsupials and other animals so abundantly in the past. The fessiliferous deposits were examined and a number of specimens were secured, including two nearly complete skulls, one of Thylacolco carnifex, the other of an extinct macropod.

Messrs. T. Iredale and G. P. Whitley spent a month on Michaelmas Cay, North Queensland, during the boring operations of the Great Barrier Reef Investigation Committee, directed by Mr. C. Hedley. During this period they were the guests of the Committee, to whom the Trustees are indebted for this opportunity to obtain a representative collection of the fauna of the Cay.

Mr. T. Hodge Smith visited the Kyogle and Lionsville districts to study the mode of occurrence and make collections of zeolites and calcite. From the Kyogle quarries he obtained a large collection of zeolites, including some splendid examples of chabazite. The cost of this trip was generously defrayed by Mr. Anthony Hordern, to whom the Trustees desire to express their warmest thanks.

Messrs. A. Musgrave and G. P. Whitley, while on annual leave, spent some time on the North-West Islet, Capricorn Group, Queensland, as members of a party organised by Mr. E. F. Pollock under the auspices of the Royal Zoological Society of New South Wales. Our officers were thus enabled to make collections of the land and marine fauna of the Group and subsequently did some collecting at Mount Tambourine, Queensland, a very rich locality, particularly as regards insects.

Messrs. G. P. Whitley and W. Boardman spent some days on board the trawler Bar-ea-mul, and obtained a large collection of fishes and invertebrates, some of exceptional interest. For this privilege the Trustees are indebted to Mr. D. Hann, the owner, and Captain H. Johnston.

Of shorter excursions the following are worthy of mention :-

Messrs. A. Musgrave and T. G. Campbell made several successful excursions to National Park in quest of insects.

Messrs. F. A. McNeill, T. Iredale, and others continued to investigate the life of the tidal flat at Gunnamatta Bay with excellent results; on one occasion the Museum party was accompanied by Dr. W. E. J. Paradice, R.A.N., who made a hydrographic survey of the fla's and prepared a map which will be of signal service in connection with future work in this locality.

Mr. T. Hodge Smith collected a fine suite of Permo-carboniferous fossils during a short visit to Harper's Hill, Maitland district.

Library.—During the year the library acquired by purchase and exchange 298 volumes, independent of loose parts and reprints, which are detailed in Appendix E. Additions to the Library: Included in these accessions is a complete set of the Journal of Morphology, formerly in the library of the late Professor W. A. Haswell, D.Sc., F.R.S., at one time a Trustee. As in past years much assistance has been rendered to students, correspondents, and the press, the resources of the library being freely placed at their disposal often involving a considerable amount of labour.

Duties connected with editing and publishing have absorbed a good deal of time. Apart from the Museum publications published during the year under review, elsewhere enumerated, three parts and an index of the "Scientific Results of the F.I.S. 'Endeavour'" were issued.

Mr. F. D. McCarthy, Assistant Librarian, has performed his duties with meticulous attention and has recatalogued a large part of the library.

Lectures.—An extensive series of lectures has been delivered during the past year and the attendance at the public lectures was as usual very gratifying.

Seventeen Popular Science lectures were delivered in the Lecture Hall as follows:-Attendance. Lecturer. Subject.
"In the Queensland Bush" Date A. Musgrave 354 9 July, 1925 " New South Wales in Ages Past" 260 F. L. Grutzmacher 6 Aug. 275 W. W. Thorpe ... " Egypt " 13 Aug. ... Prof. G. Two unofficial lectures were delivered in August, 1925, Mr. A. Musgrave addressing the Millions Club on "Lord Howe Island," and Mr. W. W. Thorpe the officers and crew of the U.S.S. "Colorado" on "The Aborigines of New South Wales."

On three occasions the Lecture Hall was made available for the exhibition of cinema films. Or 14th August First National Pictures Ltd. screened the first release in Sydney of "The Lost World," and on 16th September Mr. E. A. Briggs gave a film lecture "The Black Heart of New Guinea." On 7th April, Professor Maurice Poel, of Charleroi University, Pelgium, gave a lecture on "The Flight of the Bird," during which he showed an interesting series of moving lictures; this lecture was delivered under the auspices of the Australian Aero Club.

CURATORIAL WORK.

Mammals (E. Le G. Troughton in charge).—A very interesting and diversified series of mammals was registered as the result of collecting by various members of the Museum Staff and the active co-operation of private collectors stimulated by the response to numerous in pairies and the ready loan of equipment.

Some of the more interesting denations included the following :-

A collection from Ysalel, Solomon Islands, including three Curcus (Phalanger orientalis), rodents, and seven species of bats (Mr. N. S. Heffernau); four seals from various localities (Mr. A. S. le Souel). An interesting series of bats was presented by Mr. R. H. Dangar, Dr. J. S. Armstrong (Samoa), Mr. L. Abrahams, Miss E. Hosie, and Mr. W. Lockhert Bell (Tanna, New Hebrides). A small collection received from the late Thomas Steel was registered and incorporated in the collection. Mr. R. F. Armstrong, Health Office, Eitape, Mandated Territory, New Guinea, presented a collection from that locality, including a cuscus and a number of indigenous rats.

From the American Museum of Natural History, New York, we received by exchange a fine gallery exhibit of the rare South American marsupial Canolestes fuliginosus, as well as a spirit specimen.

The lion group was renovated and remodelled, the foreground altered and improved and a new and much improved style of lighting was installed. Considerable improvement was made in the gallery of mammals, the ungulate section being completely overhauled and rearranged.

Twenty-seven mounted specimens were removed and rehabilitated by the taxidermists, who also skinned, filled out, and otherwise treated 146 mammal skins during the year. The customary systematic disinfection of gallery and study collections has been carried out, and much "old collection" material has been named and registered.

Collections of bats have been submitted for identification by the Director of the Queensland Museum and the Curator of the Tasmanian Museum; the results of research on these specimens will be published later.

The following papers and articles have been prepared by Mr. Troughton during the year:-

"The Bats of Australia and New Guinea," in "Wild Animals of Australasia," by Messrs. le Souef, Burrell and Troughton.

"The Mystery of Marsupial Birth," Aust. Mus. Magazine, Vol. II, No. 11.

In addition, Mr. Troughton revised and corrected the whole of the proof sheets of "The Wild Animals of Australasia."

Skeletons (E. Le G. Troughton in charge).—Donations included aboriginal skulls from Western Australia (Mr. W. W. Froggatt) and from Queensland (Mr. J. Y. McCord); two seal crania (Arctocephalus hookeri) by the Curator of the Auckland Zoo; two fur seal crania from the Recherche Archipelago by Mr. A. S. le Souef; an interesting bandicoot skeleton fr. m the Comboyne Plateau by Dr. C. E. Chisholm.

Dr. Alexs Hrdlicka, U.S. National Museum, made a careful study of our collection of aboriginal crania, two hundred of which were withdrawn from the store and submitted to him for examination.

Specimens cleaned and remounted for the gallery included two human skeletons, and the skeleton of two kangaroos and a leopard, as well as a number of crania. The Strap-toothed Whale has been repaired and recoloured, a platypus skeleton and 72 skulls prepared and included in the collection. The fine elephant skeleton was removed from the gallery, and is now being overhauled and repaired.

All cases and specimens in the osteological gallery were cleaned and fumigated throughout.

Birds (J. R. Kinghorn in charge; H. O. Fletcher, part-time assistant).—During the year 151 birds were presented and 14 obtained by exchange with Dr. Koelz, University of Michigan.

The duplicate collection of study skins has now been catalogued, classified, and card-indexed, and the exhibited series has been completely overhauled and rearranged, the cases painted and unsightly wooden steps replaced by glass shelving. During the year 201 gallery exhibits were removed, renovated, and prepared for the use of schools and other exhibitions. One hundred and fifty-one birds were skinned and made into study specimens, and 498 skins were examined and cleaned.

The whole of the store space was overhauled, the specimens examined, catalogued, and renovated where necessary.

Specimens for study and other purposes have been issued on loan to Miss F. M. Irby, Dr. J. A. Leader, Messrs. A. J. and A. G. Campbell, N. W. Cayley, H. Wolstenholme, and P. Gilbert. Considerable assistance has been accorded to the Chief Secretary in matters relating to bird protection, and the Department of Trade and Customs regarding birds for import or export.

The following papers have been written by Mr. Kinghorn during the year :-

"The Food and Economic Value of the Stubble Quail, Coturnix pectoralis." (In the press.)
"Notes on and Lists of Birds collected in South and South-west Australia." (In the press.)

Reptiles and Amphibians (J. R. Kinghorn in charge, H. O. Fletcher, part-time assistant).— During the year 284 specimens were added to the collection, of which 230 were presented, 39 exchanged, and 15 purchased. Among the larger collections acquired were specimens received from Dr. R. M. Bousek, Czecho-slovakia, Messrs. R. J. Armstrong, New Guinea, Dr. Hudson, H.M.A.S. "Geranium." Mr. N. S. Heffernan, Solomon Islands, collected and presented a large series of rare and interesting frogs and lizards.

The spirit collections have been thoroughly overhauled at frequent intervals, and the catalogue checked and brought up to date.

The exhibited series of Reptiles and Amphibians has been rearranged and the cases painted. A large specimen of the Luth (Dermochelys coriacea) was remounted and coloured, and an Indian Python and several smaller exhibits were renovated and transferred to country museums. A number of casts were repaired and re-coloured for the gallery.

Papers prepared by Mr. Kinghera for publication :-

"A New Genus of Sea Snake and other Reptiles collected by H.M.A.S. 'Geranium' during a Cruise to North Australia." Proc. Zool. Soc., London, 1926.
"A Review of the Family Pygopodidæ," Rec. Austr. Mus., xv, 1, 1926.

"Notes on Pseudelaps minutus Fry," Rec. Austr. Mus., xv, 1, 1926.
"Monograph of the Reptiles and Amphibians of the Solomon Islands." (Nearing completion.)

Fishes (G. P. Whitley in charge).—The collections have again been enriched by important donations by Dr. W. E. J. Paradice, R.A.N., whose colleagues on the surveying vessels "Herald," "Geranium," and "Moresby," are following his example in collecting marine specimens for the Museum. Mr. D. G. Stead has presented a fine series of about 3,000 Malayan fishes, and a supplementary collection of Hawaiian species. Mr. R. E. Baxter continues to contribute rarities from Lord Howe Island, and Mr. N. S. Heffernan has presented a collection from the Solomon Islands. The Trustees are also indebted to officers of the State Fisheries Branch for specimens of freshwater eels; to Mr. N. Ward for fishes dredged in Port Jackson and Port Phillip, and to Captains A. G. Flett and Knud Moller, of the trawlers, for deep sea fishes.

A collection was obtained by Mr. Whitley while on holiday in the Capricorn Group, Queensland, and a number of specimens were obtained by exchange with the South African Museum, Cape Town.

During the year a number of casts, including the Star-gazer (Kathetostoma lave), White-spotted Ray (Ætobatis narinari), and a Ghost Shark (Chimæra ogilbyi), were prepared by the articulators and coloured by Miss E. A. King.

Additional consignments of eels have been sent to Dr. Johs Schmidt. Copenhagen, and heads of fishes for osteological study have been supplied to Dr. H. L. Kesteven, Bulahdelah, New South Wales. A number of Australian fishes were forwarded to the London School of Tropical Medicine.

Through the courtesy of Mr. H. A. Longman, Director, and Mr. T. C. Marshall of the Queensland Museum, Mr. Whitley was able to make notes on several species of rare or little-known fishes preserved in that institution.

The following papers and articles were prepared for publication :-

"List of the Fishes recorded from Queensland Waters," by A. R. McCulloch and G. P. Whitley, Mem. Queensland Mus., viii, 2.

"Studies in Australian Fishes, No. 8." by A. R. McCulloch, Rec. Austr. Mus., xv, 1.

"Report on some Fishes obtained by the F.I.S. 'Endeavour,' part V." by A. R. McCulloch, Biol.

Results Endeavour, V, 4.
"The Biology of the North-west Islet, Capricorn Group—Fishes," by G. P. Whitley, Aust. Zoologist, iv, 4.

"Name List of the Fishes of Fiji," by G. P. Whitley. (In the press.)
"Bibliography of James Douglas Ogilby," by G. P. Whitley. (In the press.)
"Stranded Wayfarers," by G. P. Whitley, Aust. Mus. Mag., ii, 7.
"The Story of the Freshwater Eel," by H. K. Anderson and G. P. Whitley, Aust. Mus. Mag., ii, 8. "A Giant Fish," by G. P. Whitley. Aust. Mus. Mag., ii, 10.
"Trawling in New South Wales," by G. P. Whitley, Mid-Pacific Mag., xxxi, 6.

Insects and Arachnids (A. Musgrave in charge; T. G. Campbell, assistant).—Important donations were received from Mr. N. S. Heffernan (Ysabel and Russel Island), and Mr. C. E. Hart (Guadalcanar), greatly increasing our knowledge of the Solomon Islands insect fauna. A valuable series of Australian Nemestrinid types was presented by Dr. Ian Mackerras, and a fine collection of *Peripatus* was received from Mr. Thomas Steel. Collections of Queensland insects were received from Messrs. R. V. Oldham, W. D. Campbell, and C. E. Sims. Mr. H. T. Price presented a collection of economic insects from Fiji, Mr. W. W. Froggatt a series of timber pests, and Rev. J. Done (Mabuiag) a number of insects from Torres Strait. Mr. Musgrave presented a large general collection made at National Park, and a series of insects and spiders collected by himself and Mr. G. P. Whitley while on holiday in the Capricorn Group and at Mt. Tambourine, Queensland. Messrs. Musgrave and Campbell obtained much useful material on collecting trips to National Park.

A valuable collection of Nycteribids was obtained by exchange with Dr. H. Scott, Cambridge, England, and a large number of moths was purchased from Mr. W. W. Froggatt. A collection of Asilidæ was purchased from Mr. C. Gibbons.

The principal work of the section has consisted in identifying, registering, and labelling the collections received, and preparing reports on specimens submitted for identification and information.

In order to keep the nomenclature of the collections up to date, collections of insects belonging to various groups have been forwarded to specialists. We have to acknowledge cordial assistance in this direction received from Mr. H. J. Carter, Sydney (Coleoptera); Mr. J. Clark, Perth (Formicidæ); Dr. E. W. Ferguson, Sydney (Diptera); Mr. H. Hacker, Brisbane (Hymenoptera); Mr. A. M. Lea, Adelaide (Coleoptera); Mr. Tindale, Adelaide (Orthoptera); Dr. A. Jefferis Turner, Brisbane (Heterocera).

Revision and rearrangement of the Australian Cicadidæ, and Acrididæ, and Pacific Island Buprestidæ has been completed, and the spirit collection has been overhauled and the collection of Peripatus and Island Arachnida revised and catalogued.

The following papers and articles have been contributed by Mr. Musgrave during the year :-

"A Sand-wasp's Burrow," Aust. Mus. Mag., ii, 7.
"In the Queensland Bush," Ibid., ii, 9.

"The Biology of North-west Islet, Capricorn Group" (Narrative, Insects, Bibliography), Aust. Zoologist, iv, 4.

"The Bottle and Glass Rocks, Port Jackson," Aust. Mus. Mag., ii, 9, (in collaboration with Mr. F. A. McNeill).

"From Sea to Soup," Aust. Mus. Mag., ii, 10 (in collaboration with Mr. G. P. Whitley).

Mr. Campbell has written the following articles:-

"The Emperor Gum Moth and its Allies," Aust. Mus. Mag., ii 9. "A New Gallery Exhibit: A large Paper Wasp's Nest," Ibid., ii, 10.

Mollusca (T. Iredale in charge; Miss J. Allan, assistant).—During the year collections were received from most of our regular correspondents, such as Mr. N. S. Heffernan, Mr. G. McAndrew and Mr. M. Ward. Dr. Eland Shaw contributed a series from anchor mud obtained at Borneo, and a series of paratypes of New Zealand mollusca was presented by Mr. H. J. Finlay and T. Iredale, who have recently described these shells in the transactions of the New Zealand Institute,

A good collection was obtained by Messrs. Iredale and Whitley on Michaelmas Cay, North Queensland, while they were the guests of the Great Barrier Reef Investigation Committee.

Dr. Burton Bradley and Mr. A. Mackay have been investigating the life-history of the liver fluke, and in connection with this research many specimens of land shells have been submitted for identification during the search for the molluscan host or hosts of this destructive parasite. Several inquiries were also received regarding Trochus shell, the price of which has now advanced considerably.

Miss Allan has prepared a useful catalogue of the monographs on mollusca contained in the large series of conchological works.

The ordinary routine work has been carried out, but the scattered condition of the collections has hampered this work, and it is hoped that before long more suitable disposition of the reserve collections will be made.

Mr. Iredale has during the year prepared the following papers and articles for publication:—
"Captain Cook's Artists," Aust. Mus. Mag., ii, 7.
"George Forster's Paintings," Aust. Zoologist, iv.
"The Status of Amicula," Nautilus, xxxix.
"The Cuttle-fish 'Bones' of the Sydney Beaches," Aust. Zoologist, iv.
"Three Victorian Species of Ophicardelus," Vict. Nat., xlii.
"The Picture of Nautilus of Amicula," Aust. Zoologist in

"The Biology of North-west Islet, Capricorn Group—Marine Mollusca," Aust. Zoologist, iv.
"The Last Word on Ancyclastrum," Nautilus, xxxix.

"Monograph of Australian Loricates" (three parts), Aust. Zoologist, iv. (In collaboration with A. F. Basset Hull.)

"Australian Crested Penguins," Emu, xxv. (In collaboration with Mr. N. W. Cayley.)

Four obituary notes were contributed by Mr. Iredale :-

W. H. Hargraves, Nautilus, xxxix, pp. 68, 69.

R. Murdoch, Ibid., pp. 69, 70. W. L. May, *Ibid.*, pp. 140, 141.J. D. Ogilby, *Auk.*, 1926, p. 138.

Marine Invertebrates (F. A. McNeill in charge; A. A. Livingstone and W. Boardman, assistants; .-A large number of accessions has been received entailing much routine work.

Mr. N. S. Heffernan, Solomon Islands and Vanikoro, continues to contribute valuable donations, notably a collection of rare Decapoda from an area not usually accessible to Museum collectors. Mr. G. McAndrew of Shellharbour has made an exhaustive collection of the commoner South Coast forms and is now concentrating on the rarer species and periodical visitors; very little of value escapes the notice of this keen and skilful collector. Mr. Melbourne Ward took advantage of a trans-Pacific trip to collect Decapoda and Echinoderms at the various ports of call, and through his efforts we now have numerous representatives of these groups from Honolulu, Pago Pago, and San Francisco Bay. We are also indebted to Mr. Ward for the loan of a fine salt-water aquarium, complete with air-pump and other fittings; this is now installed and experimental work is in progress.

During a visit to New Caledonia Mr. A. F. Basset Hull collected a number of Decapoda at Noumea and at Lifou, Loyalty Islands, localities which were hitherto poorly represented in our collections. The collection of the late Thomas Steel, handed over just prior to his death in 1926, is of special interest and value. A large series of worms is included, and the Land Planarians in particular constitute a very fine acquisition, as they are the finest set of Australian species in the world. We continue to receive valuable material through the efforts of medical officers on naval surveying vessels, and we are indebted to Dr. K. Hudson, H.M.A.S. "Geranium" and Dr. L. Lockwood, H.M.A.S. "Moresby" for their co-operation.

A collection of British Bryozoa was received from Mr. G. A. Burr, London, and an exchange with the U.S. National Museum of Australian Decapoda for an equivalent in American material is in progress.

The work of checking, registering, and card-cataloguing the very large donation of Bryozoa received from Mr. W. H. Wooster last year is being continued, and a résumé of the exhibited series of worms has been undertaken. A large collection of Echinoderms collected by the Mawson Australasian Antarctic Expedition has been received back from Professor R. Koehler of Lyons, and the collections of Sphæromid (sea lice) species, and parasitic Isopoda have been returned by the South Australian Museum, whither they were despatched for examination and report by Messrs, H. M. Hale and W. H. Baker.

At the invitation of the Harbour Trust Commissioners several trips have been made to study the crustacean pests which attack wharf piles, and the information and specimens gathered will form the basis of a report under preparation.

The following papers and articles have been prepared during the year:-

"Studies on Australian Bryozoa No. 3," by A. A. Livingstone, Rec. Aust. Mus., x, 1.

"Bryozoa of North-west Islet, Capricorn Group," by A. A. Livingstone, Aust. Zoologist, iv, 4.

"Life of the Tidal Flats," by F. A. McNeill and others, Aust. Mus. Mag., ii, 8.

"The Gordian Worm," by W. Boardman, Aust. Mus. Mag., ii, 10.

"Earthworms," by A. A. Livingstone, Aust. Mus. Mag., ii, 10.

"The Decapoda of North-west Islet, Capricorn Group," by F. A. McNeill (to be published in the next issue of The Australian Zoologist).

"Studies on Australian Bryozoa, No. 4," by A. A. Livingstone (in the press).

"Supplementary List of the Echinoderms collected by Surg.-Lieut, Commander W. E. J. Paradice in Queensland and North Australia," by F. A. McNeill and A. A. Livingstone (in the press)

Ethnology (W. W. Thorpe in charge; H. O. Fletcher, part-time assistant).—The principal donations were a series of aboriginal mill-stones from West of Lake Boolabooka, New South Wales, by Mr. V. W. Mahoney; Papuan ceremonial and domestic implements, by Mr. T. E. Rofe; Sinhalese moonstone tray by the Kandyan Art Association; spears and womerahs, Groote Eylandt, by the Rev. H. E. Warren; bark canoe, Sir Edward Pellew Group, by Commander H. T. Bennett, R.A.N.; Indian weapons by Mr. B. Bertram; a large collection of ethnographical material, principally from Ocean and Pleasant Islands, by Mr. F. Danvers Power; weapons and ornaments, Mandated Territory, New Guinea, by Mr. R. F. Armstrong; weapons and charms from equatorial Africa, by Miss C. Coveny; a fine outrigger canoe from Reef Island, Santa Cruz Group, by Mr. N. S. Heffernan; aboriginal weapons from North-east Queensland, by Mr. J. E. Webber.

From the American Museum of Natural History we received by exchange busts restorations of Trinil, Neanderthal, and Cro-Magnon men. Exchange with the Otago University Museum augmented our Chatham Island collections, and a number of Netherlands New Guinea specimens were acquired by exchange with the Koloniaal Instituut, Amsterdam.

Every effort has been made to maintain the collection in good order, and the official Papuan Collection has been overhauled and disinfected.

The "ravi" exhibit has now been enclosed, and the wall casing at the rear of the structure has been utilised for the exhibition of bows, arrows, drums, and ceremonial material. A fine aboriginal bark canoe was installed, room having been obtained by withdrawing an inferior dug-out.

Mr. Thorpe has contributed the following articles to the Australian Museum Magazine:-

"Stencilled Handmarks," vol. II, No. 7.
"Primitive Initiation," vol. II, No. 8.

"A Probable Relic of La Perouse," vol. II, No. 9.
"The Ravi or Papuan Club House," vol. II, No. 10.

Numismatics (W. W. Thorpe in charge) .- The outstanding acquisitions during the year were a medal and badges of the Special Constabulary, London, worn during the war period, presented by Mr. G. W. Ransom, and a series of current and post-war Russian metal and paper money, obtained by purchase.

The contents of the coin cases on view near the main entrance have been regularly changed.

Requests for identification of coins have increased in number, and make a considerable demand on Mr. Thorpe's time.

Palacontology (The Director in charge, assisted by W. W. Thorpe and H. O. Fletcher).—The most important acquisition was the large collection purchased from Mr. Varney Parkes, comprising the gatherings of many years; this collection is now awaiting registration. A fine collection of Triassic fish from the brick pit at Beacon Hill, near Manly, was obtained, chiefly presented by, or purchased from Mr. P. Carew, and presented by Dr. C. Anderson. A small collection of the interesting phyllopod Legia mitchelli from Belmont, Newcastle District, was presented by Mr. John Mitchell. Collections of extinct marsupial remains from the Wellington Caves were presented by Messrs. J. H. Truman, E. J. George, E. M. Temby and A. C. Brown, and specimens from the same locality were collected by Dr. C. Anderson and Mr. G. C. Clutton. A large series of bones of Meiolania platyceps, Lord Howe Island, was purchased from Messrs. M. Nicholls and R. V. Hines. Skull casts of the interesting mammal-like reptile Cynograthus crateronotus, from the Triassic of South Africa, and of Sthenurus occidentalis, an extinct macropod from the Mammoth Cave, Western Australia, were added to the collection.

During the year the collection of vertebrate fossils was overhauled and a number of fresh labels was prepared for the exhibition series. Progress has been made in the preparation of a card catalogue to the collection of fossils.

An instructive exhibit placed on view is a series of specimens illustrating the structure and occurrence of the extinct Chelonian Mciolania.

Papers and articles prepared by Dr. Anderson during the year:—
"The Australian Fauna." Journ. Roy. Soc. N.S. Wales, lix.
"The Higher Vertebrates of the Tertiary and Post Tertiary of Australia." (To be incorporated in Professor Sir Edgeworth David's "Geology of Australia.")

"The Horse and its Ancestors." Aust. Mus. Mag., ii, 8.

"The Extinct Horned Turtle Micolania." Aust. Mus. Mag., ii, 10.

"The Wellington Caves." Aust. Mus. Mag. ii, 11.

"Obituaries," (A. R. McCalloch, J. D. Ogilby, T. Steel). Aust. Mus. Mag., ii, 8.

An Obituary of the late A. R. McCalloch, to be published in the "Records," is in the press.

Mineralogy (T. Hodge Smith in charge, C. M. G. Friend, assistant).—Six hundred and ninety-eight minerals were registered during the year. The following species not previously represented have been added to the collection:—Aenigmatite, Allactite, Allingite, Ampangabeite, Aphrosiderite, Aphthitalite, Argyrodite, Argyropyrite, Atopite, Barcenite, Barysilite, Bastnacite, Beaverite, Bementite, Beraunite, Bertrandite, Berzeliite, Blomstrandine, Brugnatellite, Cacoxenite, Calciovolborthite, Catapleite, Clinohumite, Connelite, Cryolithionite, Delafossite, Euclase, Fizelylite, Franckeite, Fremontite, Gavite, Gehlenite, Carronite, Chalenite, Carlonite, Calciovolborthite, Carlonite, Calciovolborthite, Carlonite, Calciovolborthite, Carlonite, Calciovolborthite, Carlonite, Calciovolborthite, Carlonite, Calciovolborthite, Calciovolb Germanite, Glockerite, Griphite, Hardystonite, Hercynite, Jezekite, Langbanite, Leucophoenicite, Mixite, Neotocite, Paragonite, Piadysconte, Priorite, Pseudobrookite, Pyrochroite, Pyroxmangite, Reinite, Riebeckite, Rinkite, Risorite, Roemerite, Struverite, Thomsenolite, Thortveitite, Thuringite, Trimerite, Triploidite, Tyuyamunite, Vashegite, Warwickite, Whewellite, Wiikite, by exchange with Ward's Natural History Establishment; Ptilolite and Gryolite, by exchange with the Geological Survey of India; Carphose except by exchange with the Department of Mines, South Australia; and Barrandite, by exchange with Mr. Goo. Smith.

A month was spent in the field collecting zeolites from Kyogle and investigating the occurrence of calcite at the Garibaldi Mine, Lioneville; much valuable assistance was rendered by Mr. Friend in this work. Over 480 specimens of zeolites and calcite were added to the collection, and some of the finest specimens of chabazite contained in the Museum collection were obtained from this locality.

The work of the Department has again been very greatly hampered by the lack of any storage facilities.

The following papers have been published:—
"Mineralogical Notes No. 2," by T. Hodge Smith, Rec. Ausl. Mus. xv, 1.

"Mineral Collecting on the Northern Rivers of New South Wales," by T. Hodge Smith, Aust. Mus. Mag. ii, 10.

Petrology (T. Hodge Smith in charge, C. M. G. Friend, assistant).—Over 130 rocks have been added to the collection during the year. Much time has been spent in naming a large collection of unnamed rocks from Antarctica and New South Wales, and over 400 of these have been examined and named; this work has been greatly facilitated by the excellent micro-slides prepared by Mr. Kingsley.

The "St. Catherine" siderite and the "Olivenza," "Orgueil," and "El Tlahi" aerolites have been added to the collection.

The work of registering the rock collection commenced last year is now almost complete, the bulk of the work having been carried out by Mr. Friend. A card index of the collection has been instituted and is complete for all rocks named.

Mr. Friend has spent a considerable time at the University continuing his studies in chemistry.

The following paper has been published:

" Ticraco Creek, Siderite," Rec. Aust. Mus. xv, 1, 1926, by T. Hodge Smith and H. P. White.

GENERAL.

The educational activities of the Museum have been well maintained. Frequent demands are made on members of the staff to assist in naming and arranging collections. At the request of Professor Griffith Taylor, Mr. W. W. Thorpe named and localised a series of ethnological specimens in the Geography Department, University of Sydney, and Miss J. Allan determined the collection of shells in the Teachers' Training College at the University.

A large collection of natural history specimens, ethnological objects, and coins was, at the suggestion of the Under Secretary, Department of Education, named and arranged by members of the Museum Staff for the Burwood School of Arts.

Small collections are issued on loan, for teaching or exhibition purposes, to bodies such as the Kindergarten Union, the Missionary Society, the Naturalists' Society, and others,

Frequent demands are made for the loan of lantern slides, of which we now possess a large series, for school and other purposes.

List of Specimens acquired during the year ending 30th June, 1926 :-

inghorn, J. R	Zoologist in charge of Birds, Reptiles and Amphibia	9 Oct., 1899	
roughton, E. Le G	Zoologist in charge of Mammals and Skeletons	1 Sept., 1907	4 Feb., 1921.
Iusgrave, A.	Entomologist	13 Jan., 1908	4 Feb., 1921.
leNeill, F. A.	Zoologist in charge of Lower Invertebrates	7 Feb., 1910	1 June, 1920.
mith, T. H.	Minoralogist and Detailed invertebrates	18 May, 1914	3 Feb., 1922.
redale, T.	Mineralogist and Petrologist		3 Mar., 1922.
Vhitley, G. P	Conchologist	1 April, 1924	6 Feb., 1925.
ainbow, W. A.	Ichthyologist	18 April, 1922	2 Oct., 1925.
llan, Miss C. M. J.	Librarian		1 Oct., 1916.
ivingstone, A. A.	Assistant in Conchology	5 Feb., 1917	7 Dec., 1923.
	Cadet	24 May, 1920	24 May, 1920.
ampbell, T. G	Cadet	13 Dec., 1920	13 Dec., 1920.
letcher, H. O	General Assistant	6 Aug., 1918	16 May, 1921.
Soardman, W	Cadet	18 April, 1922	18 April, 1922.
riend, C. M. G	Cadet	1 May, 1924	1 May, 1924.
IcCarthy, F. D	Assistant Librarian	29 Mar., 1920	29 Mar., 1920.
rimble, J. A	Accountant	1 July, 1909	1 Oct., 1916.
Iurphy, T. A	Clerk	1 May, 1911	1 Oct., 1916.
ohnstone, Miss G. E	Stenographer	1 Aug., 1924	1 Aug., 1924
lenson, T. A.	Foreman Artificer	1 May, 1902	7 Feb., 1925
ackson, H	Assistant Artificer	9 June, 1910	6 Oct., 1920.
lutton, G. C	Articulator	25 April, 1904	1 May, 1913.
ingsley, J	Assistant Articulator	21 July, 1913	21 July, 1913.
rant, H. S	Taxidermist	5 Oct., 1909	2 Mar., 1918.
Vright, J. H	Assistant Taxidermist	13 May, 1908	5 Nov., 1917.
arnes, Wm	Assistant Taxidermist	1 June, 1922	1 June, 1922.
Voodhead, J	Printer	27 Sept., 1897	27 Sept., 1897.
arnes, A	Chief Attendant	7 Dec., 1897	1 July, 1922.
latson, J	Senior Attendant	8 May, 1914	1 July, 1922.
ackay, A	Attendant	13 Mar., 1915	1 July, 1922.
ill, E. T.	Attendant	8 Oct., 1917	8 Oct., 1917.
assey, D.	Attendant	8 Dec., 1917	8 Dec., 1917.
Velsh, A. B	Attendant	4 Nov., 1918	4 Nov., 1918.
orris, E. G	Attendant	10 Oct., 1921	10 Oct., 1921.
edway, W. A	Attendant	2 June, 1922	2 June, 1922.
ein, H. W	Attendant	1 July, 1922	1 July, 1922.
cIver, J	Attendant	29 Mar., 1926	29 Mar., 1926.
arnes, Miss G.	Attendant	1 July, 1924	1 July, 1924.
aylings, F. L	Attendant	1 July, 1922	24 Aug., 1924.
lazebrook, T.	Attendant		11 Nov., 1922.

APPENDIX D.

Honorary Staff of the Australian Museum at 30th June, 1926.

	Date of first appoint- ment in the Museum.	Date of appointment to present position.
Professor T. Harvey Johnston, M.A., D.Sc., Hon. Zoologist Edw. F. Hallman, B.Sc., Hon. Zoologist A. F. Bassett Hull, Hon. Ornithologist G.A. Waterhouse, D.Sc., B.E., Hon. Entomologist H. J. Carter, B.A., Hon. Entomologist Professor L. Harrison, B.Sc., B.A., Hon. Zoologist E. A. Briggs, M.Sc., Hon. Zoologist W. S. Dun, Hon. Palæontologist Charles Hedley, Hon. Conchologist H. Leighton Kesteven, D.Sc., M.D., Hon. Zoologist	9 June, 1909 7 Sept., 1917 3 Oct., 1919 2 July, 1920 1 July, 1921 1 June, 1912 3 Nov., 1922	1 Apr., 1912, 7 Sept., 1917. 3 Oct., 1919. 2 July, 1920. 1 July, 1921. 1 July, 1921. 3 Nov., 1922. 4 Apr., 1924.

APPENDIX E.

ADDITIONS TO THE LIBRARY.

-	ADD	ITIONS TO	THE LI	BRARY.	- C.
Reg. No.	Books.	How nequired.	Reg. No.	Books.	How acquired.
21573	PART I.—AUTHORS. ALDERSON, E. G. Studies in Ampullaria.		21721 21679	CXLIV, Mammalia, No. 6. CXLV, Geology, No. 16.	
21760	1 vol. 4to. Cambridge, 1924 BANFIELD, E. J. Last Leaves from Dunk	Presented	21680 21683	CXLVI, Biography, No. 1. CXLVII, Insecta, No. 25. 27 vols. 8vo. Various.	
21706	Island. With introduction by A. H. Chisholm. 1 vol. 8vo. Australia [Sydney], 1925.		21678	Folio Series— Vols. XXIII, Mollusca, No. 2.	Presented
21670	BANKS, N. Collected Papers. 1 vol. 8vo. Various. BASEDOW, Herbert. The Australian Abori-	Presented	21681	YVVI Dilada N. 9	by T. Steel,
175511	ginal. 1 vol. 8vo. Adelaide, 1925.	Purchased	21682	XXVI, Ethnology, No. 2. XXVII, General Zoology, No. 5.	
21780	BINNEY, G. W. and Others. The Land and Fresh Water Shells of North America. Pt. 5. Monograph of American Corbiculadæ (Recent and Fossil), by Temple Prime.		21684 21850	XXIX, Invertebrata, No. 1. 4 vols. 8vo. Various, PAN-PACIFIC FOOD CONSERVATION CON- FERENCE. Proceedings of the First. held under the auspices of the Pan-Pacific	Presented
21856	(Smith. Misc. Coll. 145). 1 vol. 8vo. Washington, 1865. BROINOWSKI, Gracius J. Birds and Mammals of Australia			Union, Honolulu, Hawaii, July 31 to August 14, 1924. (Mid-Pacific Magazine, XXIX, 1-4). 1 vol. 8vo. Honolulu, 1925.	Day of A
21863		Presented by H. S. Grant.	21853-4	PAN-PACIFIC SCIENCE CONGRESS. Proceedings, Australia, 1923. Melbourne Meeting, 13-22 August, 1923; Sydney Meeting,	Fresented
21777	1 vol. 8vo. Liverpool & London, 1925 DEUTSCHE TIEFSEE-EXPEDITION AUF DEM DAMPFER "VALDIVIA," 1898-99. Wissenschaftliche Ergebnisse, Bd. XVII, h.	Purchased		23 August to 3 September, 1923, held under the auspices of the Australian National Research Council. Edited by Gerald Light- foot. Vols. I-II.	
21707	2. 1 vol. 4to. Jena, 1925. FÉJÉRVARY, G. J. De. Collected Papers.		21714	2 vols. 8vo. Melbourne, 1924. PILSBRY, Henry. A review of the Land Mollusca of the Belgian Congo, chiefly based	Presented
21779	l vol. 4to. Various. GÖLDI, Emil August. Göldi-Göldlü-Göldlin; beitrag zur kenntniss der geschichte einer schweizerischen Familie.	Presented		on the Collections of the American Congo Expedition, 1909–1915. (Bull. Amer. Mus. Nat. Hist., XL). 1 vol. 8vo. New York, 1919.	Propertal
21704	HALLMAN, E. F. Collected Papers.	- 1	21669	ROHEIM, Géza. Australian Totemism; a Psycho-Analytic Study in Anthropology, with	Fresented
21711	HEDLEY, C. Collected Papers. 1 vol. 8vo. Various. 1 vol. 8vo. Various.		21000	an introduction by M. D. Eber. 1 vol. 8vo. London, 1925.	Purchased
21708	HOWCHIN, W. Collected Papers. I vol. 8vo. Various.		21868	ROWLEY, John. Taxidermy and Museum Exhibition, with a preface by F. M. Chapman. 1 vol. 8vo. London & New York, 1925.	D. 1. 1
21769	ILLIGER, Car. Prodromus systematis Mam- malium et Avium additis terminis Zoograp- hicis utriusque classis, eorusque versione Germanica.		21671	RUIZ, M. N. Nueva Teoria Cosmica y Su Aplicarion a las Ciencias Naturales. Mecanica, Celeste, Cosmologia, Fisica y Quimica.	
	1 vol. 8vo. Berolini, 181i.	Presented by T.	21710	1 vol. 8vo. Comitan, Mexico, 1925. SJÖGREN, H. J., Collected Papers. 1 vol. 8vo. Various.	
21576	LORD, C. E. and H. H. SCOTT. A Synopsis of the Vertebrate Animals of Tasmania.	Iredale.	21712	SMITH, E. A. Collected Papers.	
21574-5	1 vol. 8vo. Hobart, 1924. I McCURDY, G. G. Human Origins; A Manual of Prehistory, in 2 vols.		21705 21713	SMITH, M. A. Collected Papers. I vol. 8vo. Various. WAIT, W. E Manual of the Birds of Ceylon. 1 vol. 4to. London, 1925.	Presented
21 579–86	1 vol. 8vo. New York and London, 1924. I MATHEWS, Gregory M. The Birds of Australia. Vols. V-XI and Supplements Nos. I-III.		21709	b	y Colombo Museum
