Edgar R. Waite.

The Museum,

Leeds, (England).

1891.

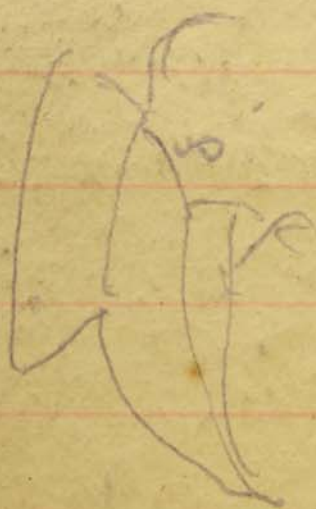

Aug. 4 to Aug. 17.

Book No 24

Simeroch

Wren Muse =

Zool =

1891. August.

4. Left Leeds at 1.40 +
arrived at Hull at 3.15
I then went down to
the Humber Dock and
aboard the "Flamingo"
one of Wilson's boats, I
looked after 2 berths +
then back to the Station
where I met Simpson
at 4.5 from Bridlington
Back to the dock again
+ deposited the luggage
we then had some tea
+ went aboard at 5.0
but did not begin to
move until 6.20. Out
of Dock + into the Humber

we passed Spurn at
9.0. turned in about
11.0 fairly at sea -

5. We rose about 6.30
a beautiful morning
a nice swell on the
water this increased to-
wards night & we got
a big roll on - breakfast
9.30 Dinner 2.30 Tea
7.30. One of the Saloon
passengers is a young
fellow named Barnes
now living at Bedford -
his father is Dr Barnes
of Readingley - we turned
in about 10.30

6. Awakened about 1.30

They were stopping the
boat we supposed for
the pilate - rose at
6.30 - $4\frac{1}{2}$ hours up the
Elbe - Our sunrise had
been correct we had
2 pilates one for the
mouth & the other for
the Upper Elbe - Our
watches had to be put
on half an hour here
Hanover on our right
Schleswig Holstein on
our left, the banks
are bright green and
covered with cattle &
many windmills, there

are several terms about
the fishing boats on
the Elbe of which there
are many are provided
with "side-boards;" they
can turn round in no
time. Several storks
flew across the river
their red beaks & legs
being very noticeable -
we landed at Sandthor-
hafen about 10.30
German time. Took our
bags to the Custom House
& then chartered a Drosche
& drove to Struett's Hotel
Called at the Post Office
& then to the Botanical

gardens + saw Victoria
regia, then to the Zoo.
+ paid extra for the
Aquarium bought guides
to both places. Returned
to Streets + I went in
search of the Museum
(Nat Hist) but found
it closed until September
rejoined Simpson at
the hotel had a wash &
Jable d'hote dinner at
4:0. Had a wander about
the place, it is a fine
port. Went off for the
Circus Renz + there being
no seats at liberty

excepting the 5 Marks
+ the gallerie we went
among the gods, after
the usual performance
which was exceptionally
good they filled the
arena with water by
means of 2 cascades
+ put on live ducks.

Some clever aquatics
closed the performance
we took a car and
returned to Streets' at
11-0 + "Streitway retired

7 we did not rise until
about 8-0. we had a
simple German breakfast
Kaffee mit Butterbrot

+ then took one of the
Alster Steamers from the
Brunner Alster to the
farther part of the
Amsse Alster, by name
Mühlentkamp, we
landed there & walked
in the direction of
Hamburg along the E
side of the Alster. +
visited the Kunst Halle
filled with splendid
pictures. There is a
"Schwabe" collection, it
occupies 4 small rooms
+ contains for the most
part English works.

We next returned to
our hotel & looked out
train for Berlin, then
had a stroll through
the Arcades back to
the hotel took a
droschke to the Bahn-
-hof Berliner where
we had a bit of
lunch & left at 12:35
for Berlin, they took
our tickets before the
train started.

Hamburg is a very
English sort of place
most people there speak
the language - the flower
- girls were peculiar straw

hats with a sort of
cross behind. Every
official from the Customs
who swarm to the
Bus drivers wear uniform
& what with Porters
Policemen & other people
all in uniform the place
looks very military, this
I suppose will be the
case throughout Germany
All or most of the streets
have trees, on both sides
the climate is very
luxuriant. Arrived at
Berlin 12.30 by our
watches which we had

to put on another
 $\frac{1}{4}$ hour. The entrance
to Berlin by the Reich
- richstrasse station is
not very imposing -
Engaged room at the
Hotel Metropole & had
 $5\frac{1}{2}$ hr dinner. Then
strolled through the
City U d S. so looking
at the shops.

8 As the Monopole was
very expensive & as
Simpson had to meet
someone for a night
at the Central Hotel
I went to U d S
 59^a III + IV. for Möblierte

Zimmer by the card
which Birch had given
me. I found it under
the proprietorship of
Fran Köppen + engaged
a bed room for 3 Marks
we then went back
to Monopol + by a
little running cleared
out to our respective
habitations. We then
went for the sights
saw the Altes + Neues
Museums of Pictures
+ Sculpture + the Börse
a large + exceedingly
busy place, filled

with thousands of
men bidding against
one another & making
a terrible din, from
the visitors gallery we
had a grand sight
of the proceedings. Next
along Oranienburger
Str. to the Synagogue
a fine place. I then
went with my letters
of introduction to
find Ernst Weber in
Alexander Str 14 III
+ Paul Ries % Saust
+ Ries Brückenstrasse 12
the former was out
& the latter's place

Closed from 1 to 3 - I
called about 2-0. So
Could not afford to
wait, before going
there I had left Snip
-son after 1 Mark Dinner
at a Restaurant
& now being flooded
of my arrangements
I took the Ring Bahn
from Janowitzbrücke
Bahnhof to Zoologischer
Garten Bahnhof 20 pf.
Entrance 1 Mk Guide
book 40 pf. The
gardens are very fine
especially in birds

I followed the Guide
book most religiously
through every place
& did not finish
until 6.0 & as I
had arranged to
meet Simpson at the
Central at 6.30 I
took the Ring Bahn
(Stadt Bahn) to
Friedrichstrasse Bahnhof
After meeting him we
botted off for a stroll
I got some refreshment
en route. We followed
Leipsigerstrasse to
Potsdamer Bahnhof
& look up trains for

to morrow, Along Potsdam-
-erstr; + Bulow Strasse
to Zool; Garten Bahnhof
took train to Fried-
richstrasse Bkt = Just
as we got out of the
train we saw 4 or
5 fire engines being
trotted along, they do
not seem to go at it
like we do - On each
wagon they carried
a large blazing fire
brand - we followed
them into U. d. L. but
saw no fire + in a
short time they moved

off we then parted
& I turned into my
digs about 9.30- by
means of my 2 keys
Here I met the son
of Frau Köppen by
name Julius, he is
about 18 and is with
Friedländer, He spent
some time in my
room & both his father
& mother came in &
had a chat with me
I must alter my opin-
-ion of Berlin It is
indeed a magnificent
place & very German
we were taken, as

a rule for Americans
+ didn't care about it
One thing certainly
spoils the City, the
ends of the houses
present a flat sur-
face of unbroken
shabby looking brick
may be a few 100
yards in length which
if let out in England
would fetch its £10000
for advertising + it
would certainly not
be worse to the eye
than the meaningless
windowless walls

which are only two
common here. Many
of the houses have
flat tops some are
laid out as gardens
& others have fowl
-runs on their roofs -
the steam trams are
very elegant & have
1 + 2 classes. The
Thiergarten is a most
magnificent place &
reminded me of the
Westwood park at
Southampton but is
many times its size
9. Had breakfast at
my digs & met S.

corner U d L and
Friedrichstrasse at
9.15 am, we took a
Pferde Eisenbahn (Car)
to West End near
Charlottenburg and
train to Charlottenburg
& on to Potsdam. we
walked through the
Royal Park, saw the
celebrated fountain
& then to the Palais
(Sans Souci) then to
the Orangery (so called)
the Drachen House
& to the New Palais
Saw the Children of

The Kaiser being driven
out & then to Wild
Park Bahnhof left at
2.57 & arrived at
Potsdamer Bahnhof-
Berlin at 3.35 (a
quick train which
only stops once on
the way). The rail
both going & returning
by different lines
passes through the
Grünwald, chiefly
of Scotch Fir, with
a few Silver Birch
the latter are perfectly
silver & without the
black marks which

characteristic those we
have in England - a
large part of the
Forest is an Sand
which is largely -
quarried, the Acacias
are large & fine &
there are also some
oaks, Saw Redstart-
& Spot Flycatcher
which latter I also
saw in Hamburg
Next went to the
Aquarium 68 N d L
a fine place. Proteus
Puff (very "pugnax")
Nutcracker, Isonia

Vulgaris &c &c. Spent
much time there at
a guide & then had
some refreshment,
joined Simpson again
& walked the streets
Sunday, many shops
open also. Sunday
Börse, Theatres Pan-
-opticon, Circus &c
went in about 8.30
wrote up this book
& also to Rose - I
found the great
depressive power of
the water in the
Aquarium very trying
& hurtful to the eyes

10 did not awake until
9-0 - After breakfast
I went with Antonie
Köppen to Friedländer's
& the manager showed
me through their immense
Stores, At 11-0 I went
to the Royal Museum
& sent in my card to
Prof. Möbius, the Keeper
of Zool Dept. he took
me round all private
places & explained the
working etc of the Museum
The whole of the inside
of the Cases ~~stands~~ etc
are covered with a

drab canvas a piece
of which he gave me
the stands & other things
are painted of the
same color. Other things
which struck me are
mentioned at the other
end of this book. He
introduced me to Paul
Matschie Assistant in
Zoologie, who showed
me some birds in
particular & gave me
some reprints of his
Ornithological writings.
Friedländer got me
only copy of Verto 2
of the Annals for them

"Natura novitates" Dr
Möbius gave me the
name of Dr Müller
6 Sonnenplatz for
Insect transformations
& I called on him. all
his preparations are in
Alcohol - none dry - I
then had some dinner
& returned to H. & L.
took my bag to the
Anhalter Bahnhof
met Simpson at 4 45
& at 5.30 left for Dres
den - the district we
traversed is very flat
hills & miles of fir

Trees - I saw a Squirrel
running up one of them
Hooded Crow common on
there are large stretches
of country covered with
some plant bearing
a head of bright yellow
flowers ^{Supreme} stopped ^{us} at
^{morning} Falkenberg - Raderau +

Coswig - at Coswig we
saw our first hills
since leaving England,
Arrived at Dresden at
8.40. Neues Stadt Bahnhof
I went down into the
Altles Markt & put up
at Hotel de Rome.
(Stadt Rom) - After

depositing our luggage
we went on a voyage
of discovery & spent our
time on the Brühl
Terrasse, & then turned
in -

11 After breakfast I went
to the Zoological Museum
it was not open this
day to the public but
I was soon in Dr.

Meyer was away but
Dr. Keller showed me
round, there is a very
fine collection of birds
nests & also Humming
birds & Paradisea. The

Museum throughout is
very good & large.
Critical remarks at
the other end of the
book. I left about 2
& then went to the
Picture Gallery where I
met Simpson. The picture
is the Tribute money by
Titians - Raphael's Mad-
onna di San Sisto &

are also world renowned.
We next "did the Pbs." for
50 pf & then to the
Stadt Rom for dinner.
After dinner he went
to the Zoo. Not so

good - the first wild
bird I saw was a
nutcracker, it might
have been an escape.
In no Zoo yet have I
seen *Elephas africanus*
wandered through the
old town & bought some
samples of Dresden
China - Returned to
Stadt Rom & had tea
wandered through the
New town & culminated
at the Brühl Terrasse
again, the promenade
General timber raft
going down the Elbe

The place is very
English, we got tea
not coffee here, there
are any number of
English & American
people in the town
Returned to our Hotel
I wrote to Father, Rose,
& Phil Soc =

12 Up at 5.45 had
breakfast, a droschke
to the station & left
for Prag at 7.0 ar-
rived at 11.15 stopping
at several places incl =
Bodenbach where our
luggage was examined
the route between

Shandau is the finest
I have seen in Ger-
-many high wooded
banks, long rafts of
lumber on the Elbe -
ploughing with Oxen
to, Arriving at Prague
went to Hotel Monopol
then to see New Museum
building through the
streets then to old
Museum to see Dr.
Fritsch but he was
away & would be for
a week - The Museum
closed today, to go
tomorrow - Through

Kleiner Ring past
old Town Hall - Hussite
Church over Karl's
Brücke, (repairing)
to St Nicholas Kirche
up Rhadschein - good
view of Prag - In the
Rhadschein with the
Royal Palaces & the
Capuchin Monastery
outside the fortification
by the Reichs Thor
outside the farreins
win by Sand Thor
over the Kettensteig (Brücke)
through the Jews'
quarter & back to the
hotel to tea.

Spent the evening at
the Prag Exhibition
wrote to Rose.

13. After Frühstück I
went again to the
Museum I was shown
round by one of the
assistants. It is not
in very good condition
not clean, no attempt
at education, good
in ancient books and
Mss. 2 Alca unpenned
returned to the Monopol
at 11.0 + at 11.35 left
for Vienna - stopped
at Pardubitz + Baunm

The Capital of Moravia
On nearing Vienna
The scenery becomes
wilder, the City can
be seen on the Starboard
bow long before it is
reached we landed at
7.20 & ~~went across the~~
~~road to the Hotel Metropole~~
& ~~then had a stroll~~
took a Drosche through
the town to the Hotel
Metropole situated on
the Franz Josef Quay.
had a stroll round
the town.

14. Had breakfast &
then went out first

to the Cathedral & then
round the Ring Strasse
looking at the shops &
visiting the Rathhaus
the 2 theatres, the
Palace of Justice & the
Houses of Parliament
round which we were
conducted. I called
at the K.K. Nat. Hist
Museum but found
it was closed open to-
morrow. In "Ring" we
passed successively the
Kärthner Ring, Opern
Ring, Burg Ring
Franzens Ring & the

Schoften Ring, back to
Franz Josephs Quai
I then went for some
lunch while S. had
a rest, not feeling well
Afterwards we went to
the Prater, a large Park
to the Englishes Garden
where there were some
africans performing then
to the Vivarium really
a small Zoo, the best
Animal was the great
Ant eater, Saw the Ani-
mals fed, These are
all in the Prater we
Continued our walk &
had almost returned to

The Vivarium when it
began to rain. Quickly
at first & we sheltered
under a tree it soon
came down in torrents
through the tree in
bucketsful, we were
at last driven out &
made a rush of 100
yards for the Vivarium
but were soaked when
we landed, called at
Cooks for letters & then
had a feed, prowled
round the town I
bought some Patent
Solitaires for Father &
a purse with the Christmas

Arrived for the Mr we
then turned in.
15. Before Breakfast we
went to see the Votiv
Church, returned to
the town frühstücked
& then I set off for the
Museum it is a most
magnificent place &
has only been open 2
years on the 10th inst.
this occupied me until
12:00 when Simpson joined
me. Before going to
the Museum however
I had bought an album
for Rose 7.50 fl. After
seeing the Museum.

We walked to the Bel-
vedere + right across
the Cathedral we saw
some Mountains. And
learning that they were
within easy reach of
Vienna we hotted the
2 miles back again
+ then took a Danube
Canal Steamer to
Nussdorf disembarking
we had a short walk
to the Zahnradbahn
or toothed - wheel
Railway up the
Kahlenberg. between
the lines there is a
third - toothed into

which cog-wheels
work There is a most
magnificent view of
Vienna & the Carpathians
from the top but the
further ascent of ~~some~~
100 feet disclosed a
panorama such as I
have never before seen
We lounged about the
cafes in true parisian
style with the addition
of "Red Beef" & at 7.0
began the descent there
were some thousands of
dragon flies, hovering
about the train at
7.30 we took the boat

again & $3\frac{1}{4}$ hr later
landed in Wien, I
wrote to Rose & then we
turned in -

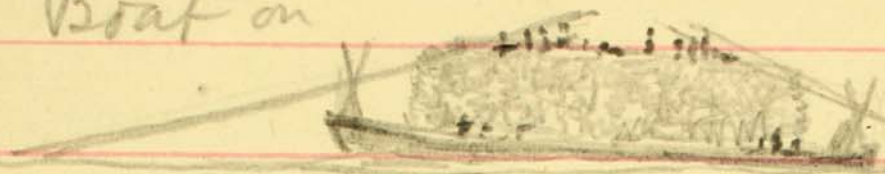

16 Up at 5-0. At 6-30
let we left Vienna
from the Franz Joseph
Quai on which is
the Metropole, on the
Danube Canal, steaming
against the stream wh
is very rapid over the
same course as yesterday
~~post~~ Leopoldsdorf & the still broader
Kahlenberg - At
7-20 we reached the Danube
& transferred to a larger
steamer. The Gisela
At 8-0 we called at

Koornenburg

(Magpie)

Boat on

the

Danube taking wood, with men
on the pile the long beams are
(placed by Herr Satanas)
for steering so, Greifensberg 8.45

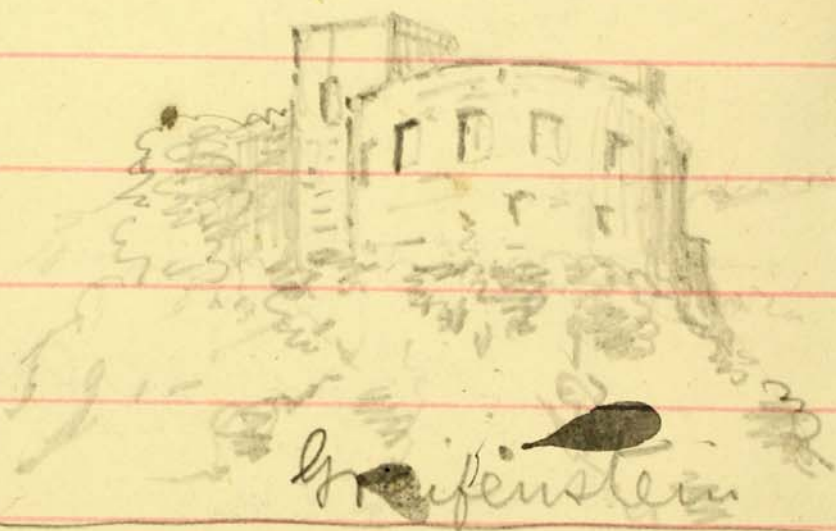

Left the

Wiener wato

got into

flatter land

with the hills

Greifensberg

at some distance on the left

One of the steers-
men -

7. Oars at each end 7 Men at
stem

After a flat & uninteresting
ride we arrived at Tulba
at 10.0 & wound down our
funnel to pass under the
bridge of the Franz-Joseph
Railway. Some water mills
on the Danube are interesting
the wheels are very wide &
the mill floats like Noah's
Ark but is anchored.

Church Tulln

The timber boats
like the at the top
of the page carry
fine-wood done up in bundles.
The larger one below takes
timber proper as a raft. At
10.55 arrived at Zwentendorf
Shortly after this it began

to rain & I took to reading
"He went for a Soldier"

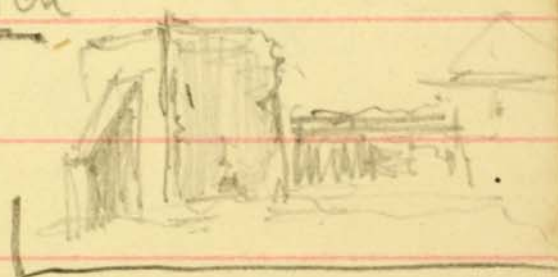

At 13-0 we went below
Indulged in a 1.80 fl
dinner à la Carte -

Hollenburg 12-30 - Abbey
of Göttweig

Kerns at
1-0 +

Stein Church

getting into
hill Country
again
all
the

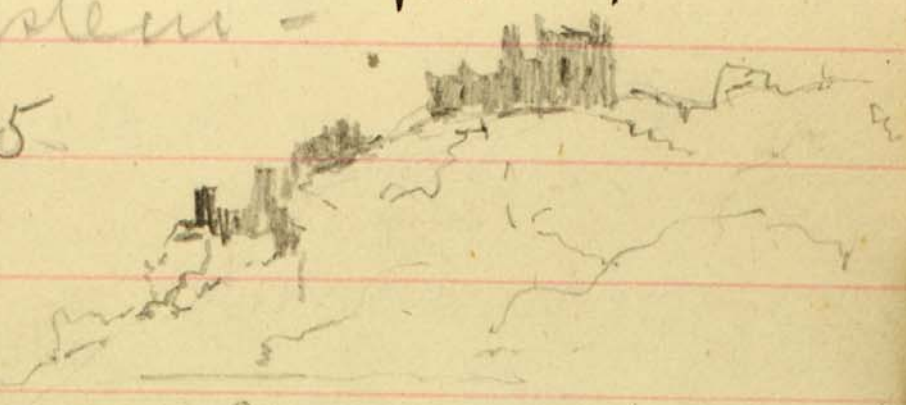

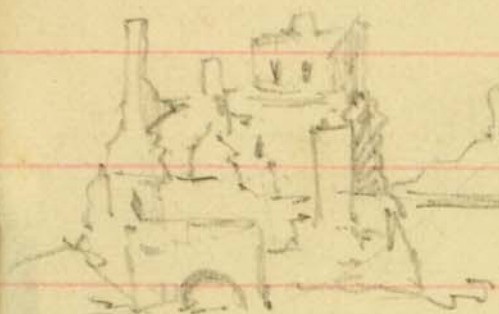

Mountain Sides are terraced

for Vine Culture passed.

Richard I Confines 1192

Durrenstein -

at 11:45

One of the Churches

here is used as a barn +
one at Krenns as a Theatre -

Durrenstein is opposite Rossatz
where we stopped. Very like
Loch Fyne scenery here -

Wissenkirchen 2:15

Met the down boat

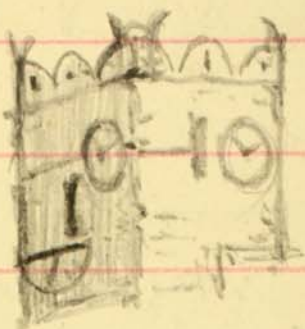

near here -

House at
Wesendorf

Parked St Michael at 2-20
On the roof are 6 lanes
See Baedekers-

Tower of St Michael
Church 2 Clocks +

A Sun dial - Some of the
tugs go one by means of
a chain laid in the pine
they grip it in front &
pay it out astern again.

Halted at Spitz at 2:45.
Tempelmann (noticed)

By the Black &
Tempelsturm.

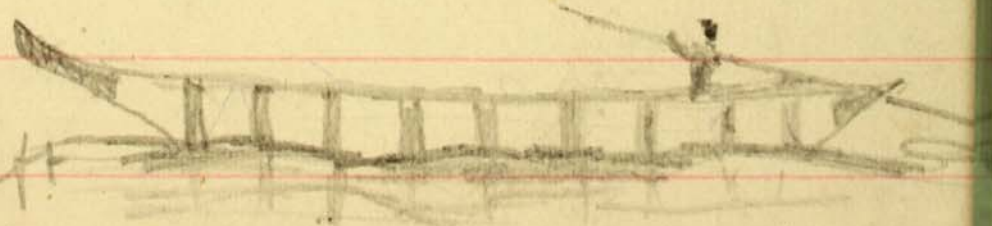

Aggstein

formerly an old
stronghold.

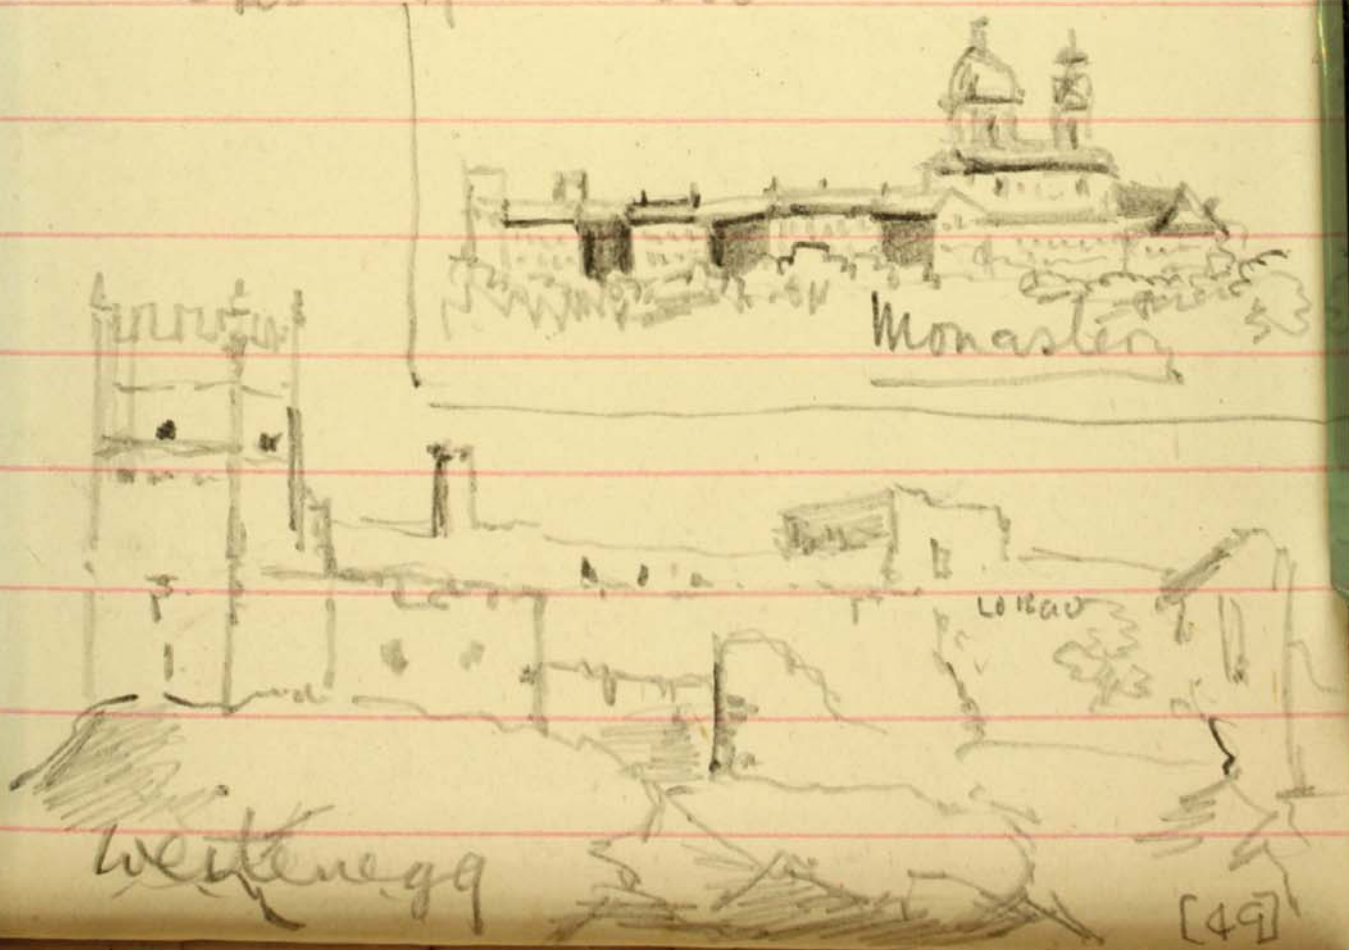

Aggstach - 3.25 - This day
is cold compared with yesterday
+ yet my thermo is 90° in
the shade. - About $\frac{1}{2}$ time
now. - The river Pelach
enters on the left (R bank)
a little further on the R
is Emersdorf + we then
see an palatial edifice
which looks like a palace
but is in reality a ben-
edictine monastery. This is
at Melk

on our left

Here about 30 peasants

Came aboard in holiday
Costume led by a Man
carrying a small crucifix
adorned with ribbons the
women wore yellow hand-
kerchiefs round their heads.
We now get among some
well wooded islands (Muepie)
at 4.30 we stop at
~~soon after the pass~~ White-
neck bristling with high
stacks of wood

I went down to the 2nd
Class Cabin to see the Cross
a model painted flesh color
with wreaths of flowers &
above the head I. N. R. I
(Jesus Nazareth Rex Iudorum)
Ebersdorf on our Right -
higher up on the same
bank we pass Klein Pöchlarn
Lahnst opposite on the
other side we halt at
Gross Pöchlarn at 4.53 -
The men appear to pull
their boats up stream which
is very rapid from the banks
& row them down. Stopped
at Marbach at 4.20
All the houses are yellow

Washed - we were due here
at 5.0 and are therefore 20
minutes late - On the top
of the hill are models of
the triple crucifix & three
figures in attendance their
crowns are gilded - The
Danube about here ought
surely to be noted for wasps
& House Martins ^{River App in here} At 5.10

we stopped at Ybbs on our
left - the largest place since
leaving Vienna, crossing
the river we again halted
at Persenbeig, we could
then see the Austrian Alps
with snow on their summits
looking lovely in the lower

ing sun. The river now is
narrowing & the banks are
steeper clothed with wood to
the water's edge. Had a cup
of Coffee & Butterbrod. On the
left we passed Donau-
dorf. I then wrote to
Miss Bowling
Sarmingstein
on the L bank
then St Nikolai
where we
stopped at
7.30. This
Castle on an
isolated rock
& a smaller
rock on the

St Nikolai [52]

other side with a large
crucifix on the summit
the river then makes
some sudden sharp turns
& the stream is exceedingly
swift. We make very
little progress here - it
is now getting dark, at
large place Green on
our right we next stop
at & take a crowd on
board. Very few of our
original visitors are on the
boat now, I now find
it will be impossible to
catch the 12:18 pm train
at Ling as the boat is
3/4 hr late now, wrote

a post Card to Roebuck
arrived at Linz at 12.40

+ retired for a snooze -

17. Rose about 4.40 but
Could not get off the boat
as we were Coaling. The
paddles have been going
a little all night to
take the strain of the
stream off the ropes -

Styrian alps -

we got ashore about 5.0

I had a stroll round posting

our correspondence - returned

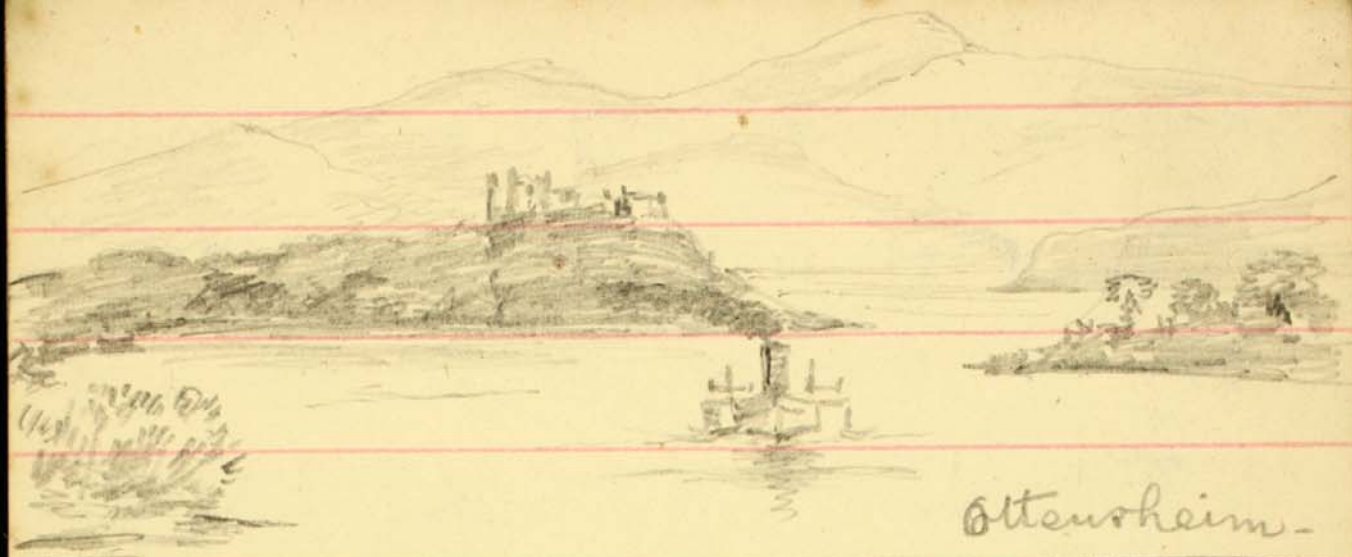

to the boat + started at 6.

to time. passed Ottersheim

on our night at 7.0 The scene

becomes flatter Our next

stopping place through

Sttenheim.

This flat district was at
 Brandstadt Efferding at
 8-0. The hills ahead show
 prospect of better scenery.
 We stay there 20 minutes
 to take in a cargo of print.
 At 8.40 we pulled up at
 Aschach on our left. I
 had just seen a heron &
 soon after a black hawk

Alldin - 43/ Kästli
 5/5
 43/ Kästli
 5/5

flew past the boat at rest
The thermometer registers
over 90° in the ~~sun~~ when
we are at rest but as
soon as the boat moves
it goes down to 70° , There
is no natural breeze -
Grand scenes now, stop
at Newham 9.20 big slopes
wooded to base, Plenty of
Crucifixes en route the priests
aboard drop their hats - Our
stock of Austrian money
is almost exhausted so
when the Steward came
up he denied we had
some fun, I told him
"wir haben nicht gelut"

1895
Schmidt
1895

carpathians

Cog-wheel Rail -

Miles

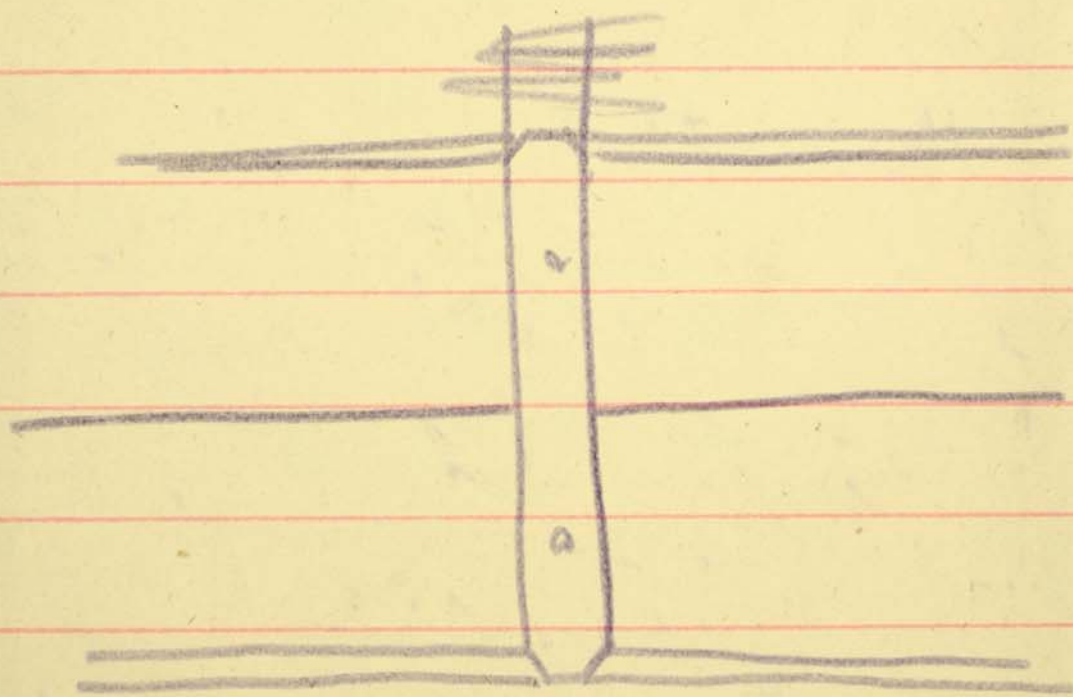

Canal.

Peterborough

[57]

getting for £1.80
dinner so would have
to one for £1.20, he did
not seem to believe that
we had no more money
& then suggested that we
had german money wh:
he would take & allow
us 58 k for 1 Mark - As
yesterday he represented
how much better the
1.80 mittagessen was
than the 1.20 so being
out for a holiday we
consented again -

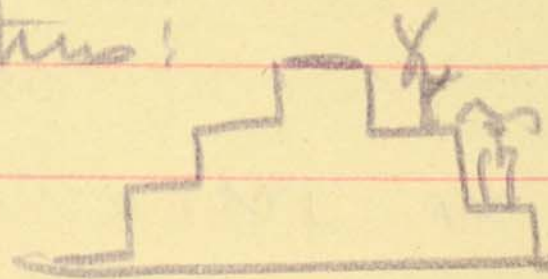

width of usual lines - 1 -
 for atropine as wide as the
 book is long -

Make green the words
 are marked on them
 for plants. The cases
 are 12 deep - most in
 even other 50

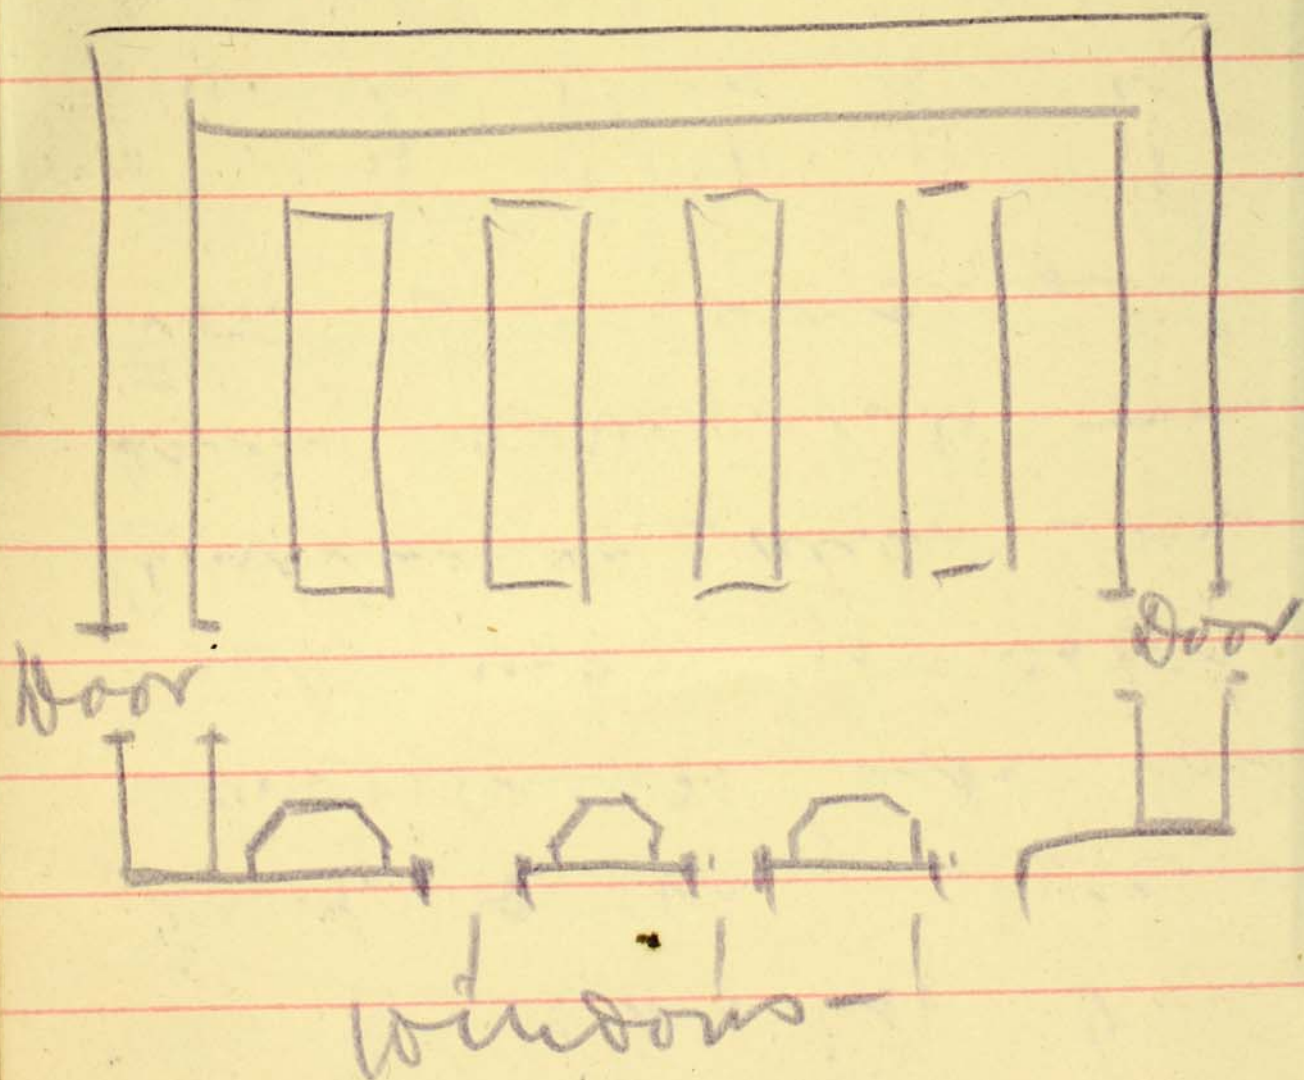

are so
I have Eggs
or skeletons of birds
Every room is numbered
at the inner side and
the number of cases
commences anew in
each room 1 to —

The Mammals are
well arranged - Each
family has a case
to itself, & have either
separate pedestals or
in tiers thus:

In the Insects collection
the divisions are of

Geographical distribution
this looks somewhat
sandy, here a small
Chalk line in the label
is adopted. This is much better
Rooms are arranged

The 4-Rided Cases

Eggs are shown in trays
of glass so —

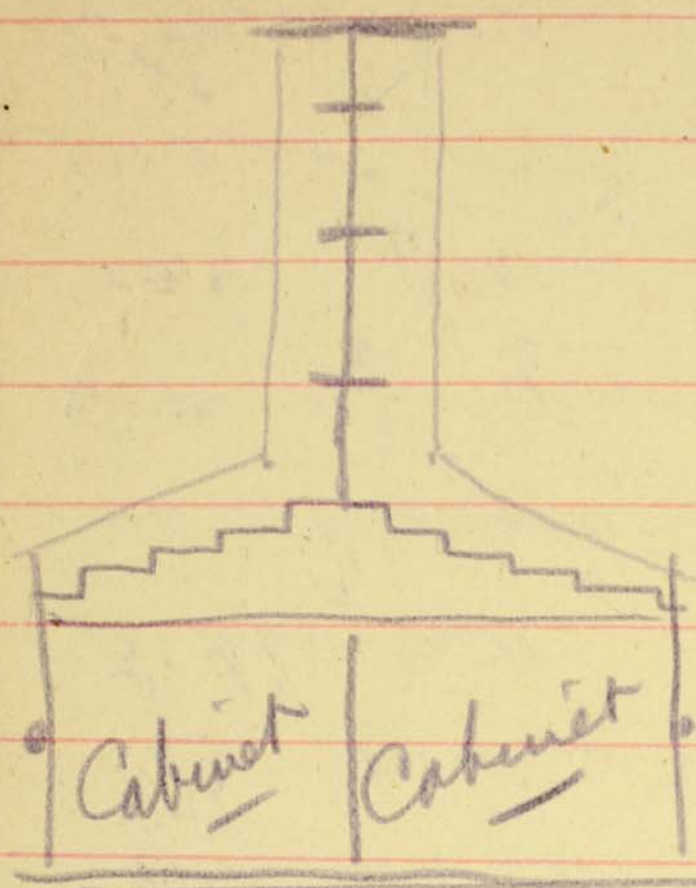

in Clutches — &
look very well —

Metal numbers on
each case for catalogue
Instead of each case
being a separate room
they are arranged

One can look through
the lot this is not
good. The wall cases
are better — In the
Berlin Museum the
labels are blue green
Red white etc. To denote

jars have an opaque
glass down the centre &
have repiles on both
sides. - A strip of wood
on the corner. One side
shows the upper & the
other the under side.
Skeletons in spirit are
very beautiful. - The
birds are mounted on
plain oak stands but
they look heavy. Very
different are the shelves
in Berlin there they
are of glass on light
iron frames here they
are wood, like book
shelves.

Groby.

Zoology ~~Old~~ the
cases are painted
black + have a very
heavy appearance.

Many are painted
deep Maroon but this
is not much better -

The spirit flasks are
closed as in Berlin -
The large Reptile

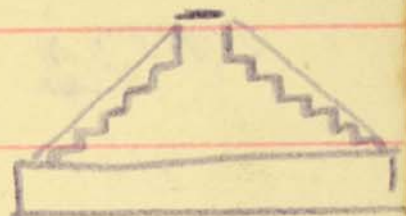

to Thick Linoleum -
No guide published yet
Cases of iron frames:

Vienna Museum

Mineral Cases

the steps painted

black, some of the smaller

minerals in stands

with porcelain trays

also wall cases

see -

Palaeontology

Geology

larva + pupa - *S. ceruus*.

D. marginalis -

Hooded Crow - R side of the
(common)

Dresden Museum

Square trap 6 1/2 inches
Square take nests of
Ground Building Bird. E.g.
Warblers they contain eggs
& young & the old bird.
Those building in trees
have the stem stuck
into a block. Drawers
in insect cases glass
on both side - Closed
Phill's glass & paraffin
All insects pinned on

London Oct 1891 - [72]

Open & Close Streams
Frein & the once celebrated
Whirlpool receives arms
Expands in one channel
past long unbroken

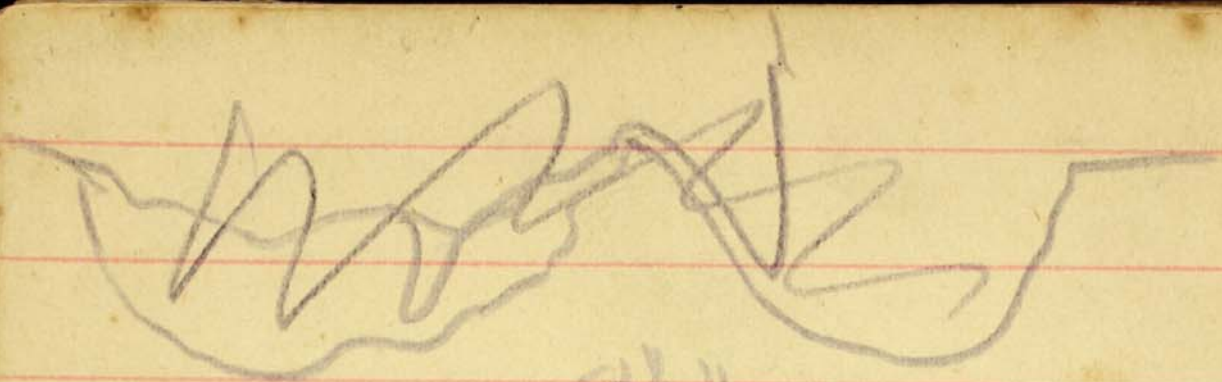

Danube.

Thundering Stream.

2nd in Europe River

Blk Forest - Connected
with Rhine by Ludwig's
Canal & with the Adriatic
by the Vienna Canal. After
travelling for 1700 miles
it discharges itself into
the Blk Sea by 7 months

(2)

At Passau the Danube ⁽³⁾
receives a considerable
accession from the R
Inn when it takes a
winding course toward
Aschach, flatter land
is then reached & the
river breaks up into
numerous arms & flows
somewhat sluggishly thro'
several miles of flat
& uninteresting country
but its apathy is soon
to be shaken off. All
the arms reunite into
one grand stream passes
on towards Ottersheim
Its aspect soon changes again

The ~~Sambe~~ ^{it rushes} hurried in by
mountain ~~flows~~ by lying in
an unbroken stream. Some
distance toward the east it
begins to expand embracing
many larger & smaller islands
& dividing into many arms one
of which may be considered the
main artery. Thus it continues
till it reaches the ^{once} celebrated
whirlpool near Grein where
all its water uniting in one
channel flows on majestically
for 40 miles till they have
worked their way thro' the
mountains' narrow passes
near the City of Krens
& coming to level ground

again near Halleuburg
divide forming Arus &
Islands to reunite near
Greifenstein whence the
river flows in a grand
column to Wien.

~~Austria~~
Soil remarkably fertile
in ^{Spain} Corn supplies Austria
In many spots heath
& Sandy plains.

Plants

Vine growth (5)
pasture & timber

Gold, Silver, Copper
abound - Coal salt
alum. Tin in Bohemia
Hungary only place
true Opal - Iron &

Native still excellent
Quicksilver Mines only
second to Spain - Lead
in Carpathians

Advantages in being far
from the sea. - But if
Coast on Adriatic -

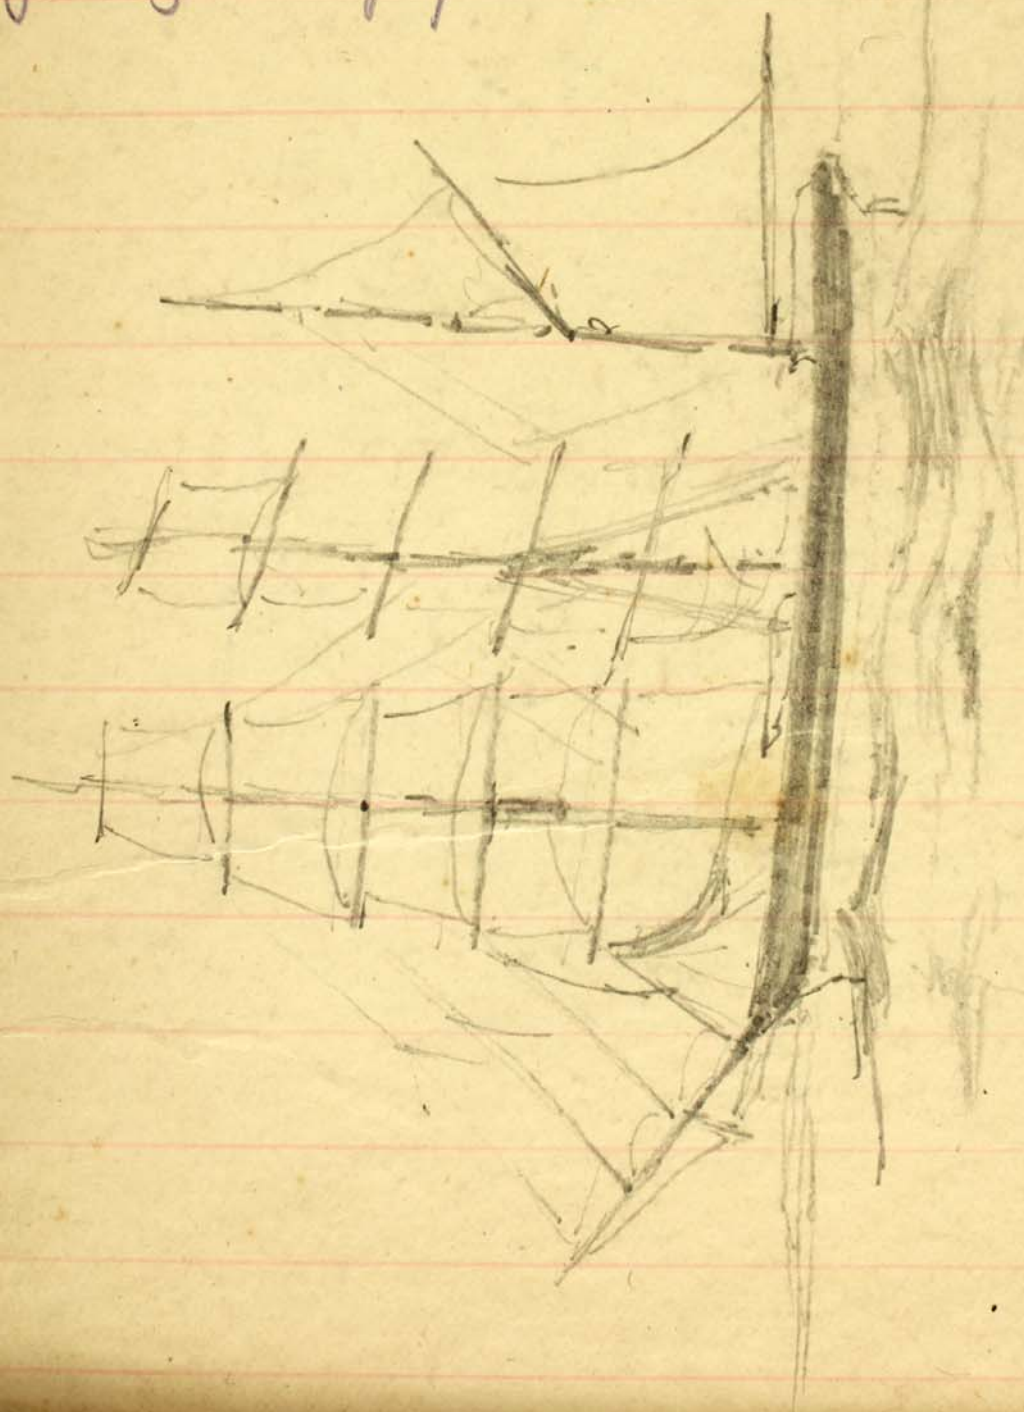

Möbius.

Bardwell re at Wien.
