

1893.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT OF TRUSTEES FOR THE YEAR 1892.)

Presented to Parliament pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL,—

The Trustees of the Australian Museum have the honor to submit to Your Excellency their Thirty-ninth Annual Report.

1. The hours during which the Museum was open to the public were, as in previous years, from 10 a.m. till 5 p.m.; but in summer till 6 p.m., except on Sundays, when they were from 2 p.m. to 5 p.m., and on Mondays, when the Museum was closed for cleaning. The number of visitors was 130,701, being a decrease of 2,144. The largest attendance on any one week day was 2,536, on Monday, 3rd October. The largest Sunday attendance was 1,066, on 13th November. The average for the year was 265 on week-days, and 712 on Sundays.

2. The collections are still steadily increasing, although, on account of the temporary disarrangement of the Museum for building purposes, and for the sake of economy, the Trustees have continued to limit the acquisition of new specimens. The principal purchases during the year have been:—

Collection of Tasmanian Minerals.

Skeletons of two whales from New Zealand.

Casts of the remarkable shell, *Pleurotomaria*, fossil and recent.

Ethnological specimens from New Zealand, South America, the South Sea Islands, &c.

The most important acquisitions by exchange have been:—

A collection of Philippine Island shells, from Dr. Von Mollendorff.

Echinodermata from the United States National Museum.

A collection of rocks and minerals from the Dumfries Museum, Scotland.

The most valuable presentations were:—

Giant earth-worms from Queensland.

Portion of a Solomon Island canoe found buried on the foreshore of Port Jackson.

Portions of trees with aboriginal carvings.

3. Collecting expeditions were sent at the request of the New South Wales Commissioners for the World's Columbian Exhibition, Chicago, to the Seal Rocks, in the Government Steamer "Thetis," to the Bellinger River District, and to Blackman's Swamp, near Lithgow, with the result that 5 Seals and 61 other Mammals, and 500 Birds, Reptiles, Fishes, &c., were procured.

A few minor collecting expeditions were sent out for special purposes, the most important of which resulted in obtaining the skeleton of an Aboriginal, together with some curious relics buried in the grave with him.

4. The work connected with the building alterations having been completed, the new hall and galleries were lent for a few months to the Department of Public Works, for the exhibition of competitive designs for a proposed new Hospital at Rossiville, Goulburn, and for the proposed new Pyrmont Bridge. Contracts were afterwards let for the erection of show cases for the more suitable display of certain of the collections, and these are well advanced.

5. The following Publications have been issued:—

Catalogue of Marine Shells by J. Brazier, Part 1, Cephalopoda; Part 2, Pteropoda.

Catalogue of Australian Mammals, by J. Douglas Ogilby.

Australian Lepidoptera and their Transformations, by the late A. W. Scott; edited and revised by Mr. A. S. Olliff and Mrs. Forde, Vol. II, Part 3.

Records of the Australian Museum, Nos. 1, 2, and 3, of Vol. II.

6. Full information with respect to the working of the Institution will be found in the Curator's Report, comprised in Appendix I.

7. The vacancy at the Board, caused by the death of C. S. Wilkinson, Esq., F.G.S., Geological Surveyor in charge, in 1891, was filled in the early part of 1892 by the election of Professor T. W. Edgeworth David.

8. It is with feelings of deep regret that the Trustees have to record the death, on 27th September, of Robert Hunt, Esq., C.M.G., one of the Elective Trustees, who occupied a seat on the Board from 1879 to 1892.

9. The following Appendices are attached to this Report:—

- I.—Curator's Report.
- II.—Annual Balance-sheet.
- III.—Attendance of Visitors.
- IV.—Attendance of the Trustees.
- V.—Donations of Specimens to the Museum.
- VI.—Exchanges.
- VII.—Additions to the Library.
- VIII.—Publications of the Australian Museum.

The Common Seal of the Museum was hereunto affixed by order of the Board, this 2nd day of May, 1893.

(Signed) JAMES C. COX, M.D.,  
Chairman.

(Signed) S. SINCLAIR,  
Secretary.

## APPENDIX I.

## CURATOR'S REPORT TO 31ST DECEMBER, 1892.

To the Trustees of the Australian Museum.

Gentlemen,

The alterations to the "Old Wing" of the Museum Buildings have now been completed, and contracts have been let for the erection of show-cases.

All the members of the staff have faithfully attended to their duties and the collections are in good order. The scientific staff has been strengthened by the engagement of Dr. T. Cooksey as Assistant in Mineralogy, and by the employment of three lads as cadets, to assist the officers in various departments.

I submit herewith a Report of the work done and the condition of each department.

## MAMMALS.

The specimens acquired and registered in this Department are:—

|                          |     |     |     |     |     |     |     |               |
|--------------------------|-----|-----|-----|-----|-----|-----|-----|---------------|
| Purchased ...            | ... | ... | ... | ... | ... | ... | ... | 30 specimens. |
| Collected ...            | ... | ... | ... | ... | ... | ... | ... | 65 "          |
| Received by exchange ... | ... | ... | ... | ... | ... | ... | ... | 2 "           |
| Presented ...            | ... | ... | ... | ... | ... | ... | ... | 69 "          |

The most noteworthy were two rare whales from New Zealand.

The Foreign mammals have been, as already intimated, withdrawn from exhibition owing to the building alterations, but the Australian mammals are on view as usual in the north end of the ground floor. A catalogue of the Australian mammals, by Mr. J. D. Ogilby, has been published.

BIRDS (*Mr. A. J. North*).

During the year 1,314 specimens of birds, nests, and eggs have been determined and registered, viz.:—

|                          |     |     |     |     |     |     |     |                |
|--------------------------|-----|-----|-----|-----|-----|-----|-----|----------------|
| Purchased ...            | ... | ... | ... | ... | ... | ... | ... | 304 specimens. |
| Collected ...            | ... | ... | ... | ... | ... | ... | ... | 634 "          |
| Received by exchange ... | ... | ... | ... | ... | ... | ... | ... | 64 "           |
| Presented ...            | ... | ... | ... | ... | ... | ... | ... | 312 "          |

The unusually large number of specimens registered is chiefly due to the collections made by Mr. R. Grant, on the Bellinger River and Blaxland's Swamp, the greater portion of which has been since sent to the Chicago Exhibition.

The principal acquisitions consist of a specimen and egg of the rare *Polytelis alexandrae*, collected by Dr. Stirling at Newcastle Waters, Central Australia, received from the Trustees of the Adelaide Museum in exchange; a number of fine specimens of *Charadrius veredus*, a very rare visitant, procured by our Taxidermist, Mr. J. A. Thorpe, at Randwick, during September and October; and a collection of Kingfishers, purchased.

The Group Collection is being steadily added to, and forms one of the most interesting portions of the Ornithological Gallery; amongst others, twenty groups have been mounted during the year, showing the mode of nidification, eggs, and young of the birds found breeding in the neighbourhood of Sydney. The Nest Collection has been rearranged and named. The Exhibition Collection of Australian Birds' Eggs has been supplemented by other eggs, in sets where possible, arranged in separate boxes and named, and a large number of tickets in the Ornithological Gallery has been renewed.

Mr. North has published the following papers in the "Records":—

- (1.) Supplement to the Descriptive Catalogue of "Nests and Eggs of Birds found Breeding in Australia and Tasmania." Part II.
- (2.) Note on the Nidification of *Manucodia comrii*, Selater.
- (3.) Additions to the Avifaunas of Tasmania, and Norfolk and Lord Howe Islands.

A paper by Professor Alfred Newton, M.A., F.R.S., &c., of Magdalene College, Cambridge, entitled, "Note on the occurrence of the Sanderling (*Calidris arenaria*) in New South Wales," has also appeared in the "Records."

REPTILES, BATRACHIANS, AND FISHES (*Mr. T. Whitelegge*).

The acquisitions registered have been:—

|                                        |     |     |     |     |     |     |     |                |
|----------------------------------------|-----|-----|-----|-----|-----|-----|-----|----------------|
| Reptiles and Batrachians—Presented ... | ... | ... | ... | ... | ... | ... | ... | 162 specimens. |
| Purchased ...                          | ... | ... | ... | ... | ... | ... | ... | 75 "           |
| Collected ...                          | ... | ... | ... | ... | ... | ... | ... | 62 "           |
| Fishes—Presented ...                   | ... | ... | ... | ... | ... | ... | ... | 63 "           |
| Purchased ...                          | ... | ... | ... | ... | ... | ... | ... | 40 "           |
| Collected ...                          | ... | ... | ... | ... | ... | ... | ... | 7 "            |

Among the reptiles worthy of notice may be mentioned a valuable collection from the Peruvian Andes, including many rare species not hitherto represented among our exhibits. The most interesting addition to the fishes was *Aulostoma chinensis*, from Lord Howe Island.

MOLLUSCA—MARINE SHELLS (*Mr. J. Brazier*).

The acquisitions registered in this Department have been:—

|                                       |     |     |     |     |     |     |     |                |
|---------------------------------------|-----|-----|-----|-----|-----|-----|-----|----------------|
| Presented (99 species) ...            | ... | ... | ... | ... | ... | ... | ... | 376 specimens. |
| Received by exchange (35 species) ... | ... | ... | ... | ... | ... | ... | ... | 123 "          |
| Purchased (2 species) ...             | ... | ... | ... | ... | ... | ... | ... | 7 "            |

The purchases include the cast (a coloured reproduction) of the recent species of *Pleurotomaria adansoniana*.

The principal donation, consisting of shells that will fill up many gaps in the collection, was made by Mr. James Dall, of New Zealand.

The

The greater part of Mr. Brazier's time has been taken up in determining, naming, and cataloguing the marine shells; and in unpacking and selecting those of Australia and Tasmania, to be laid aside for an Australian collection as soon as cases to display them in are ready.

In literature, Mr. Brazier's work is represented by—  
Catalogue of the Marine Shells of Australia and Tasmania, Parts I and II.

#### MOLLUSCA—LAND AND FRESH-WATER SHELLS (*Mr. C. Hedley*).

Mr. Hedley was engaged during most of the year in arranging the Australian land and fresh-water shells contained in the Brazier collection, and in mounting a collection of *Pelecypoda*, which had been named by E. A. Smith, Esq.

The principal exchanges effected were with Dr. Von Mollendorff, of Manila, and Mr. Suter, of Christchurch, New Zealand. Messrs. Musson and Worcester presented the largest donations.

The additions registered were acquired as follows:—

|                                    |     |     |     |     |     |                |
|------------------------------------|-----|-----|-----|-----|-----|----------------|
| Presented (92 species)             | ... | ... | ... | ... | ... | 518 specimens. |
| Collected (14 species)             | ... | ... | ... | ... | ... | 71 "           |
| Received in exchange (142 species) | ... | ... | ... | ... | ... | 464 "          |

Mr. Hedley's literary work was represented by papers—

- (1.) On the structure and Affinities of *Panda atomata*, Gray. Published in the "Records."
- (2.) On *Parmacochlea fischeri*, Smith. Published by special permission of the Trustees in the Macleay Memorial Volume.

#### INSECTA (*Mr. F. A. A. Skuse*).

Upwards of 1,277 specimens have been received and registered as follows:—

|           |     |     |     |     |     |                |
|-----------|-----|-----|-----|-----|-----|----------------|
| Presented | ... | ... | ... | ... | ... | 440 specimens. |
| Exchanged | ... | ... | ... | ... | ... | 707 "          |
| Purchased | ... | ... | ... | ... | ... | 130 "          |

These numbers represent the more important specimens which have been named, mounted and classified. In addition, 16 small miscellaneous collections have been acquired, and numerous other specimens have been reared and collected, the individual species of which, owing principally to minuteness and great numbers, have not yet been particularised, though provisionally registered.

An interesting collection of Madagascar *Lepidoptera* and *Neuroptera*, numbering 99 specimens (31 species) and a series of rare Wood-moths from the Newcastle district were purchased. Also a specimen of the scarce beetle *Phalacrognathus muelleri* was purchased from a correspondent in the Cairns district, this being the occasion of ascertaining for the first time the exact habitat of this beautiful Lucanid. Among the exchanges are a collection of exotic *Coleoptera*, 302 specimens (120 species), from Mr. A. M. Lea, Sydney, and a collection of South African *Coleoptera*, 365 specimens (96 species), from Mr. J. H. Brady, Cape Town.

Much time has been devoted to sorting, setting and re-setting series of the various orders from the duplicate collection, preparatory to their being placed on exhibition in the new gallery, to arranging the cabinet of Australian *Rhopalocera* (butterflies), and generally keeping the collections in good order and free from depredation.

Papers were published by Mr. Skuse in the "Records," as follows:—

- (1.) Notes on Australian Aquatic *Hemiptera*, No. 1.
- (2.) Remarks on a new "Cyria" from New South Wales.

#### MARINE INVERTEBRATA (*Mr. T. Whitelegge*).

The acquisitions registered in this Department amount to 348 specimens, of 212 species, of which the different sections are represented as follows:—

|                                  |     |     |     |     |                                 |
|----------------------------------|-----|-----|-----|-----|---------------------------------|
| Molluscoidea                     | ... | ... | ... | 39  | specimens received in exchange. |
| "                                | ... | ... | ... | 4   | " collected.                    |
| Crustacea                        | ... | ... | ... | 88  | " presented.                    |
| "                                | ... | ... | ... | 5   | " purchased.                    |
| "                                | ... | ... | ... | 1   | " collected.                    |
| Vermes                           | ... | ... | ... | 21  | " presented.                    |
| Echinodermata                    | ... | ... | ... | 10  | " presented.                    |
| "                                | ... | ... | ... | 147 | " received in exchange.         |
| "                                | ... | ... | ... | 32  | " collected.                    |
| Coelenterata                     | ... | ... | ... | 23  | " presented.                    |
| "                                | ... | ... | ... | 1   | " collected.                    |
| 4 Packets of Foraminiferous Sand | ... | ... | ... | ... | received in exchange.           |

The most noteworthy additions consist of a large collection of *Echinodermata*, received in exchange from the U.S. National Museum, in which 16 genera and 58 species are represented, all of which are additions to the collection; and of a small collection of *Crustacea* from Port Phillip, for which the Museum is indebted to Mr. J. Bracebridge Wilson, M.A., of Geelong, Victoria.

Much of Mr. Whitelegge's time has been occupied with the registration of specimens, in attending to the exhibits, and to the extensive duplicate collection.

ETHNOLOGICAL, NUMISMATICAL, AND HISTORICAL COLLECTIONS (*Mr. A. J. North*).

During the year, 506 Ethnological specimens have been registered, as follows:—

|                      |     |     |     |     |     |     |                |
|----------------------|-----|-----|-----|-----|-----|-----|----------------|
| Purchased            | ... | ... | ... | ... | ... | ... | 363 specimens. |
| Received by exchange | ... | ... | ... | ... | ... | ... | 37 "           |
| Presented...         | ... | ... | ... | ... | ... | ... | 105 "          |
| Collected            | ... | ... | ... | ... | ... | ... | 1 "            |

More space is wanted for the proper display of the exhibits in the Ethnological Hall, many of the specimens being hidden by recent acquisitions, although the greater portion of those obtained has been stored.

The most interesting additions consist of a number of specimens from the Dutch Moluccas, presented by Captain Carpenter, all of which are new to the Collection; eight portions of trunks of trees, with aboriginal carvings, from Narellan, presented by Mr. Albert Vickery; a number of weapons from Peru, South America, purchased; a small collection from the Solomon Islands, received in exchange; and the remains of a male aboriginal, together with a number of personal effects buried with him thirty years ago, collected by the Palæontologist, Mr. R. Etheridge, at Gorman's Flat, Parish of Wingecarabee, County Westmoreland; and who has given a full account of the ethnological observations made during the expedition in the "Records of the Museum," vol. II.

Only one Numismatical and three Historical specimens have been received during the year, all of which were presented, the most valuable of the latter being an old M.S. pamphlet, with a coloured sketch of the Crucifixion, supposed to have been used by one of the early missionaries in New South Wales to teach Christianity to the Aborigines, presented by Mr. Carl Hoffman.

PALÆONTOLOGY (*Mr. R. Etheridge, Palæontologist*).

The specimens registered during 1892 numbered 2,974, comprising as follows:—

|                 |     |     |     |     |     |     |                |
|-----------------|-----|-----|-----|-----|-----|-----|----------------|
| Purchased       | ... | ... | ... | ... | ... | ... | 143 specimens. |
| By exchange     | ... | ... | ... | ... | ... | ... | 119 "          |
| By presentation | ... | ... | ... | ... | ... | ... | 86 "           |
| Old collections | ... | ... | ... | ... | ... | ... | 2,626 "        |

The most important presentation consisted of bones of *Diprotodon*, *Phascolonus*, and other extinct marsupials, from Weetalabah Creek, by Mr. J. MacMaster.

The chief exchanges were a series of Lower Silurian Graptolites, from Sandhurst, through Mr. J. McKnight, and South Australian Tertiary Mollusca, through Mr. G. B. Pritchard.

Those portions of the old collection registered comprised, amongst others, the late Rev. J. E. T. Woods' types of Muddy Creek Tertiary Mollusca, co-types of Professor R. Tate's Victorian and South Australian Tertiary Mollusca, and a large series of similar specimens obtained through the late Mr. Bailey, of Melbourne, in 1892.

MINERAL DEPARTMENT (*Dr. T. Cooksey*).

During the year 2,604 numbers have been added to the register, embracing, in all, about 2,850 specimens. Of these 322 have been acquired as follows:—

|                                    |     |     |     |     |                |
|------------------------------------|-----|-----|-----|-----|----------------|
| By purchase (during 1891 and 1892) | ... | ... | ... | ... | 240 specimens. |
| By donation (do do)                | ... | ... | ... | ... | 31 "           |
| By exchange                        | ... | ... | ... | ... | 51 "           |

The remainder consists principally of mineral specimens which belong to the foreign collection now on exhibit in the Museum.

Among the purchases three Enhydros and some remarkably good specimens of Molybdenite are deserving of mention. These and some Bismuth minerals have been described by Professor A. Liversidge, M.A., F.R.S., in the Museum Records for August, 1892.

By exchange some very good specimens have been obtained, among which are several rare lead minerals from Scotland; and 340 specimens have been sent away.

LIBRARY (*Mr. S. Sinclair, Librarian*).

The books having been thoroughly cleaned have now all been placed in the new Library Rooms.

In spite of precautions taken, they have, in some instances, greatly suffered from their domicile in the temporary iron building, owing to the attacks of *Dermestes*, the damp, and the excessive heat. In some instances it will be necessary to rebind them.

A rough inventory shows about 6,500 volumes, of which about 460 were new acquisitions in 1891, and 220 in 1892.

The work at the catalogue was necessarily delayed, during the time the books were in temporary quarters.

The catalogue is to be in three parts, viz.:—

- Part 1.—Alphabetical Catalogue, by Author's Name.
- 2.—Periodicals, Proceedings, &c.
- 3.—Subject Index.

E. P. RAMSAY,  
Curator.

## APPENDIX II.

## ABSTRACT of Receipts and Expenditure for the year 1892.
