Proposed work during the Fellowship and contribution to AMRI objectives

Our work at AMRI is prioritised into areas where we can have the greatest impact - 'Science Clouds'. These priority areas enable our people and people who use our collection to work across fields in a cloud environment – scanning and foresighting, sharing resources, ideas and information, and innovating across fields and disciplines to drive scientific and cultural discoveries and public engagement.

Please refer to the [2017-21 AMRI Science Strategy](#) and explain which one or more of the clouds your research will deliver on and how you will address the priorities listed under each cloud.

AMRI Science Clouds

Explain how the priorities will be addressed

1. Contemporary discovery
2. Impacts of change
3. Supporting Australian industry
4. Cultural connections
