

1864.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT FROM TRUSTEES.)

Presented to both Houses of Parliament, by Command.

REPORT OF THE TRUSTEES OF THE AUSTRALIAN MUSEUM, FOR THE
YEAR ENDING 31 DECEMBER, 1863.

To HIS EXCELLENCY THE GOVERNOR-IN-CHIEF,
&c., &c., &c.

1. The Trustees of the Australian Museum have the honor to submit to your Excellency this their Tenth Annual Report.

2. The Museum has been open to the public daily (Sundays excepted) during the past year, and has been visited by 35,155 persons.

3. The system of exchanging specimens of natural history with the principal Foreign Museums is still fostered by the Trustees, who have received several valuable collections during the past year, a list of which is appended. (*Appendix No. 2.*)

4. Numerous donations have been received during the year, a list of which, with the names of the donors, is appended. (*Appendix No. 3.*)

5. In Appendix No. 4 will be found a list of the various objects sent in exchange, together with the names of the persons or institutions to which they have been transmitted.

6. Several valuable works, purchased out of the Endowment Fund, have been added to the Museum Library, a list of which is appended. (*Appendix No. 5.*)

7. Two experienced taxidermists have been occupied during the year in preparing and mounting the following specimens :—

14 skeletons of mammals and birds,
111 mammals,
268 birds,
35 reptiles and fishes,

and in cleaning and preserving from decay the collections already displayed for public inspection.

8. The Trustees have to record the retirement of the Honorable John Hay from the Board, and the election of the Honorable A. W. Scott, M.A., to fill the vacancy.

9. A catalogue of the specimens in the Museum is in course of preparation, and the first part, comprising the mammalia, is now in the press, and will shortly be sold to the public at a price just covering the cost of publication.

10. The Trustees have been under the necessity of economizing the available space in the Museum as much as possible; and by erecting a series of additional cabinets, they have been enabled to display the whole of the geological and mineralogical collections received from Paris last year.

11. The Trustees, in expectation of the new building being finished during the course of this year, have ordered from England a number of skeletons of the larger mammalia. These may be daily expected; but unless some portion of the new building is specially and without delay fitted up for them, they will of necessity be deposited in a damp and dark cellar, with other specimens which have already suffered from the same treatment.

12. The Trustees accordingly, while they readily and gratefully acknowledge the highly liberal provision which the Legislature has already made for the edifice and the successful maintenance of the Museum, feel it their duty earnestly to recommend to the favourable consideration of the Government, the great need that exists for the speedy extension of the space at their disposal. And in view of the length of time which must necessarily elapse before the completion of the whole building to a stage in which it might be generally occupied by the national collection, they would respectfully suggest that the northern wing might at once, and at a comparatively small expense, be partitioned off from the remainder, and rendered available for the exhibition of those collections which they are now unable to display to any good purpose, and which are, to a great extent, liable to rapid deterioration from the condition of the rooms in which they are stored.

13. Appendix No. 1 contains an abstract of the receipts and payments of the Trustees on behalf of the Museum, for the year ending 31 December, 1863.

14. Appendix No. 2 contains a list of the specimens received in exchange from other Museums.

15. Appendix No. 3 contains a list of the various donations during the year, with the names of the donors.

16. Appendix No. 4 contains a list of the specimens sent in exchange to various persons and institutions.

17. Appendix No. 5 contains a list of the books purchased for the Museum library.

18. The Trustees have the honor to submit this their Report for the year one thousand eight hundred and sixty-three; and in testimony thereof, have caused their corporate Seal to be hereunto affixed, this fifth day of May, one thousand eight hundred and sixty-four.

By order of the Trustees,

(L.S.)

E. DEAS THOMSON,

GERARD KREFFT,

Chairman.

Acting Curator and Secretary.
