

1868.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT FROM TRUSTEES FOR 1867.)

Presented to Parliament, pursuant to Act 17 Vict., No. 2, Sec. 9.

REPORT OF THE TRUSTEES OF THE AUSTRALIAN MUSEUM, FOR THE
YEAR ENDING 31ST OF DECEMBER, 1867.

To His EXCELLENCY THE GOVERNOR-IN-CHIEF,
&c., &c., &c.

1. The Trustees of the Australian Museum have the honor to submit to Your Excellency this their Fourteenth Annual Report.

2. The Museum has been open to the public daily (Sundays excepted) during the past year, and has been visited by 83,610 persons.

3. The system of exchanging specimens of natural history with the principal Foreign Museums is still maintained by the Trustees, who have received several valuable collections during the past year, a list of which is appended. (*Appendix No. 2.*)

4. Numerous donations have been received during the year, a list of which is appended. (*Appendix No. 3.*)

5. In *Appendix No. 4* will be found a list of the various objects sent in exchange, together with the names of the recipients.

6. Several valuable works, purchased out of the Endowment Fund, have been added to the Museum Library, a list of which is appended. (*Appendix No. 5.*)

7. Three experienced Taxidermists have been occupied during the year in preparing and mounting the following specimens:—

54 mammals,
143 birds,
10 reptiles,
23 skeletons of mammals and birds,—

and in cleaning, and preserving from decay, the collection already displayed for public inspection.

8. The Trustees have to record the re-election, as a Member of their Board, of Alexander Walker Scott, Esq., M.A.

9. The Trustees have to report that the work of forming a Catalogue of the Specimens in the Museum is still carried on, and that the part containing the Geological and Mineralogical Collection is ready for the press. They wish also to draw attention to paragraph 9 of last year's Report, stating that the first edition of the Catalogue was out of print, and that a second enlarged edition was urgently required. It would be very desirable to print such portions of the Catalogue as may be finished from time to time—in particular, the List of Minerals, Fossils, and Geological Specimens,

which would be of great assistance to persons interested in mining. The very limited sum placed at the command of the Trustees prevents them from carrying out this plan, and they suggest that application be renewed to the Government to have the Catalogue printed at the Government Printing Office free of expense.

10. The sum of £1,000 (one thousand pounds) voted by the Legislature will shortly be due to the contractor, for cabinets erected in the two north rooms on the ground floor; and a further sum of £1,000 (one thousand pounds) will be required to supply cases for the south rooms.

11. The first floor has been partly fitted up with cabinets, &c., for which a sum of £300 (three hundred pounds) was advanced from the Endowment Fund; so that the building was opened to the public during the Christmas holidays, when more than 10,000 (ten thousand) visitors passed through the Museum.

The space which the collection now occupies is more than twice the size of the old building; and to keep so large an addition clean and in repair, it will be necessary to provide additional funds.

12. The Trustees desire to point out the necessity of providing workshops for the taxidermists and carpenters outside the building, and of erecting quarters for the messenger.

13. Mr. George Masters, the Assistant Curator, has visited Tasmania, and collected a large number of valuable specimens; so that the Fauna of that Island is now well represented in the Museum. A list of the collections thus made during the year is appended. (*Appendix No. 6.*)

14. Appendix No. 1 contains an abstract of the receipts and payments of the Trustees on behalf of the Museum, for the year ending 31st December, 1867.

15. Appendix No. 2 contains a list of the specimens received in exchange.

16. Appendix No. 3 contains a list of the various donations during the year, with the names of the donors.

17. Appendix No. 4 contains a list of the specimens sent in exchange to various persons and institutions.

18. Appendix No. 5 contains a list of the books purchased for the Museum Library.

19. Appendix No. 6 contains a list of the specimens collected by Mr. George Masters, Assistant Curator.

20. The Trustees have the honor to submit this their Report for the year 1867; and, in testimony thereof, have caused their corporate Seal to be hereunto affixed, this 7th day of September, 1868.

(L.S.)

W. B. CLARKE,

Chairman.

By order of the Board of Trustees,—

GERARD KREFFT,

Curator and Secretary.
