

1885.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT OF THE TRUSTEES FOR 1884.)

Presented to Parliament, pursuant to Act 17 Vict. No. 2, sec. 9.

To HIS EXCELLENCE THE GOVERNOR AND EXECUTIVE COUNCIL.

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this their thirty-first Annual Report.

1. The Museum has been, during the year 1884, as in previous years, open to the public daily; except on Mondays, when it is necessarily closed for the purpose of cleaning. The largest attendance on any one day was on the 26th December, when 1,643 persons were registered at the doorway. The greatest Sunday attendance was 1,315, on the 13th April. The average daily number of visitors throughout the year was 262 on week-days and 853 on Sundays. The total for the year is 126,040.

2. The collections are still being increased, by means of purchases, exchanges, collecting expeditions, and donations. A list of these additions, under their separate heads, will be found in Appendices V, VI, VII, VIII. Among these may be specially mentioned several pairs of large Antelopes from South Africa; a full grown Ourang-outang of the larger species (*Simia satyrus*), and several of the smaller species (*S. morio*); a fine specimen of the Chimpanzee (*Troglodytes niger*); two Whales, one from Kiama (*Physeter macrocephalus*), and one from the coast of England, belonging to the extremely rare species known as Rudolf's Whale (*Balaenoptera borealis*); Casts of gigantic fossil remains from the British Museum, including *Elephas ganesa*, *Mastodon andium*, *Toxodon platensis*, *Sivatherium giganteum*, *Megalania prisca*, &c.; and large and important Ethnological collections.

3. Great alterations and improvements have been effected by the erection of additional wall-cases, constructed upon the best principles and at considerable cost, for the reception of large collections of skeletons, and Australian fossil remains; and for groups of Birds of Paradise, and other exhibits of great interest from New Guinea and elsewhere. Additional cases and cabinets have been provided for the mineral collections, and others are in course of construction for similar purposes.

4. Want of sufficient space in the present building is still felt as a serious drawback to the usefulness of the Museum. The Trustees nevertheless gladly express their obligation to the Government for the provision now made for further accommodation. An additional shed has been erected, which is used as a store for timber and other material. A large iron workshop has also been provided, and another of similar dimensions is in course of erection. These are to be used for the storage of spirits and bottles, and for workrooms in connection with spirit specimens.

5. Catalogues, not only of the various collections in the Museum, but also of all branches of Australian Zoology, are still in course of preparation; but no new publications have been issued during the past year.

6. Mr. Ramsay's visit to Europe in connection with the International Fisheries Exhibition enabled him to examine various Museums, Zoological Stations, and Aquaria, and has been productive of much advantage to this Museum. A report, with particulars of his proceedings and details of his arrangements for purchase and exchange of specimens, will be found in Appendix XI.

7. The exhibits which were sent to the Calcutta Exhibition have been presented by the Trustees to the Government of India.

8. The Teaching Collection, consisting of skeletons, models, and specimens illustrative of Comparative Anatomy and Natural History, which for some years past occupied the north room in the upper floor of the Museum, has been transferred to the University. This collection was specially prepared for teaching purposes, and as most of the specimens were already represented in the Museum, and it occupied space which could be better used for the display of other objects of interest, the Trustees felt themselves justified in making the transfer. Although this collection is now at the University, its ownership remains with the Trustees.

9. There has been no change in the Board during the year, by death or otherwise.

10. Annexed to this Report are the following Appendices:—

- I.—Annual Balance-sheet.
- II.—Attendance of Visitors.
- III.—Attendance of the Trustees.
- IV.—Work done by Taxidermist and Articulator.
- V.—Specimens collected.
- VI.—Specimens purchased.
- VII.—Exchanges.
- VIII.—Donations.
- IX.—Books acquired.
- X.—Duplicate Books.
- XI.—Mr. Ramsay's Report.

L.S.

The Common Seal of the Museum is affixed by order of the Board, this
eleventh day of February, 1885.

S. SINCLAIR,
Secretary.

ALFRED STEPHEN,
Crown Trustee and Chairman.

APPENDIX I.

BALANCE-SHEET of the Trustees of the Australian Museum, for the year ending 31st December, 1884.

APPENDIX IV.

SPECIMENS CURED AND MOUNTED AND OTHER WORK DONE BY THE TAXIDERMIST AND ARTICULATOR.

Mammals.

13 specimens skinned and made up.		6 specimens grouped.
69 specimens skinned, preserved, and mounted.		1 group repaired.
9 specimens remade and restored.		

Birds.

11 specimens skinned, preserved, and mounted.		18 specimens grouped.
3 specimens remade and restored.		146 specimens skinned, preserved, and made up.

Fishes.

16 specimens skinned, preserved, and mounted.		1 specimen set up.
19 specimens skinned, dressed, and preserved.		2 specimens remade and restored.

Skeletons.

Mammals—8 specimens set up.		Reptiles—1 specimen set up.
5 specimens cleaned and mended.		Fishes—8 specimens mounted and set up.
Birds—1 specimen made up.		Skull—1 mended.

Reptiles—2 specimens repaired.

Moulds and Casts.

Minerals—10 casts of nuggets of gold.		Skulls—8 moulds.
Fossils—15 moulds.		9 casts.

9 casts.

Photographs.

88 Negatives.		428 Prints.

APPENDIX V.

SPECIMENS COLLECTED.

By J. A. THORPE and J. HARRIS.
Birds :—8 species—18 specimens.

By J. A. THORPE and G. H. BARROW.
Birds :—10 species—24 specimens.
Mammals :—1 species—2 specimens.

By J. A. THORPE.
Birds :—27 species—59 specimens.
Mammals :—2 species—2 specimens.
Mollusca :—20 specimens.
Insecta :—12 specimens.
Fossils :—Collection of Spirifer.

APPENDIX VI.

SPECIMENS PURCHASED.

Mammals :—35 species—58 specimens.
Birds :—288 species—402 specimens.

Reptiles and Amphibia :—101 species—242 specimens.

Fishes :—1,277 species—1,699 specimens.

Insecta :—5 species—15 specimens.

Crustacea :—10 species—32 specimens.

Mollusca :—26 species—76 specimens.

Echinodermata :—15 species—90 specimens.

Vermes :—1 species—1 specimen.

Zoophyta and Spongida :—37 species—92 specimens.

Skeletons (mammals) :—11 species—14 specimens.

Skulls :—2 species—24 specimens.

Casts :—3 specimens.

Fossils and Minerals :—587 specimens.

Fishes, Cœlenterata, &c. :—112 species—119 specimens.

Hydromedusæ :—37 specimens.

Ethnological Specimens.

1 Nectris carnipes ...	Dr. J. C. Cox.
1 Podargus strigoides ...	
1 Dicæum hirundinaceum ...	
1 Acanthiza lineata ...	
1 Estrelida temporalis ...	Mr. F. Ratte.
1 Pachycephala gutturalis ...	
1 Tinnunculus cenchroides ...	
1 Snipe—Scolopax australis ...	Mr. A. Newcombe.
1 White Cockatoo—Cacatua galerita ...	
2 Spur-wing Plovers—Lobivanellus lobatus ...	Mr. Peter Roberts.
1 Freckled Duck—Anas naevosa ...	Mr. C. H. Roberts.
1 Gannet—Sula australis (juv.) ...	Mr. M. Faithful.
2 Hymenolaimus malacorhynchus ...	Mr. Paul.
1 Ground Parrot—Psephotus haematonotus ...	Mr. G. P. Mathew.
1 Cassowary—Casuarius galeatus ...	Mr. J. A. Daley.
2 Ptilotis pennicillatus ...	Mr. Chapman.
1 Fish Eagle—Haliatus leucogaster ...	Mr. J. A. Daley.
1 Young Lyre Bird—Menura superba ...	Mr. Flood.
1 Sparrow Hawk—Astur approximans ...	Mr. H. S. Cape.
1 Crane—Grus australis ...	Mr. H. C. Royle.
1 Hornbill—Buceros plicatus ...	
1 Spoonbill—Platalea flavipes ...	Dr. M'Kinlay.
1 Owl—Ninox odiosa ...	Mr. W. F. Cousins.
1 Pigeon—Otidirhinus insolitus ...	
Collection of Birds' eggs and nests ...	Dr. Luther.
8 Eggs of Synoicus australis ...	Mr. J. Fisher.
Collection of Moa egg-shells	Mr. H. Shaw.
of Birds' eggs ...	Mr. J. H. Murdoch.
1 Swallows' Nest—Collocalia nidifica ...	Mr. N. W. Burdekin.
4 Swallows—Collocalia nidifica ...	
1 Weaver-bird's nest ...	Captain Braithwaite.
2 Birds' nests and 2 eggs ...	Rev. A. Andrew.
Skeleton of a Pigeon—Columba palumbus ...	Mr. H. C. Royle.
25 Birds from Dinner, Hayter, and Treasury Islands ...	Mr. F. H. Joseph.
1 Nycticorax caledonicus ...	Dr. M'Kinlay, R.N.
1 Painted Snipe—Rhynchorha australis ...	
1 Seythrops nova-hollandiae ...	
1 Carpophaga sp. ...	Mr. C. Braithwaite.
1 Ptilinopus pelewensis ...	Mr. Richd. Houison.
Haleyon sp. ...	
2 " chloris ...	
Merula sp. ...	Mr. Matthew, R.N.
1 Golden Plover—Charadrius fulvus ...	
1 Limosa uropygialis ...	
1 Sandpiper—Tringoides sp. ...	
1 Tern—Sterna sp. ...	
12 Nests of Collocalia spodiopygia ...	Dr. H. B. Guppy, R.N.
1 Collocalia spodiopygia ...	
Hawk—Astur approximans ...	Mr. Jas. Ramsay, jun.
1 White Heron—Herodias syrmatophorus ...	Mr. —
1 Platycercus pennantii ...	Mr. E. R. Hinder.
<i>Reptiles and Amphibia.</i>	
1 Lizard—Hydrosaurus varius ...	Zoological Society of N.S.W.
1 Rattlesnake—Crotalus durissus ...	
1 Death Adder—Acanthophis antarctica ...	Mr. John Jackson.

Specimen.	Donor.
<i>Reptiles and Amphibia—continued.</i>	
1 Alligator— <i>Crocodilus biporcatus</i> ...	Mr. Wm. Pearse.
1 Lizard— <i>Hydrosaurus</i> sp. ...	Mr. G. Gifford.
2 Diamond Snakes— <i>Morelia spilotes</i> ...	Mr. Josh. Revill.
1 Do Do ...	Mr. Robt. Taylor.
1 Green-tree Snake— <i>Dendrophis punctulata</i> ...	Mr. J. D. Hartland.
1 Frog— <i>Hyla</i> sp. ...	Miss L. Palmer.
1 Brown Banded Snake— <i>Hoplocephalus curtus</i> ...	Mr. Macnab.
1 Black Snake— <i>Pseudochis porphyriaceus</i> ...	Mr. Thos. Rigby.
1 Death Adder— <i>Acanthophis antarctica</i> ...	Mr. J. Finch.
1 Ringed Snake— <i>Vermicella annulata</i> ...	Mr. C. Stuart.
1 Gecko— <i>Phyllurus platurus</i> ...	Capt. Wolsch.
Small collection from the Solomon Islands ...	Mr. T. H. Keech.
1 Typhlops ruppeli ...	Mr. Thos. Rigby.
1 Grammatophora sp. ...	Mr. W. Henning,
1 Gecko— <i>Phyllurus platurus</i> ...	Mr. M. Daly.
1 Sea Snake— <i>Pelamis bicolor</i> ...	Mr. Thos. Hackney.
1 Ringed Snake— <i>Vermicella annulata</i> ...	Mrs. Smith.
1 Tortoise— <i>Chelodina oblonga</i> ...	Mr. H. Dawson.
1 Slow-worm— <i>Pygopus lepidopodus</i> ...	Mr. C. J. Loader.
1 Gecko— <i>Phyllurus platurus</i> ...	Mr. M. Asher.
1 Carpet-snake— <i>Morelia variegata</i> ...	Mr. T. M'Neill.
2 Slow-worms— <i>Pygopus lepidopodus</i> ...	Mr. E. Mackinlay.
1 Young Brachysoma diadema ...	Mr. C. J. Blinman.
2 Diamond Snakes— <i>Morelia spilotes</i> ...	Mr. J. J. Hayes.
1 Death Adder— <i>Acanthophis antarctica</i> ...	Mr. S. Thomas.
1 Whip Snake— <i>Diemenia olivacea</i> ...	Mr. P. Mulronev.
1 Broad-headed Snake— <i>Hoplocephalus variegatus</i> ...	Mr. J. Lewis.
1 Snake from Solomon Islands— <i>Platurus scutatus</i> ...	Mr. J. M. Mahony.
1 Diemenia superciliosa ...	Mr. H. Collins.
1 Iguana— <i>Hydrosaurus varius</i> ...	Mr. R. Chadwick.
1 Lizard— <i>Grammatophora cristata</i> ...	Mr. R. Dumbrall.
1 Whip-snake— <i>Diemenia olivacea</i> ...	Master A. Brown.
1 Slow-worm— <i>Pygopus lepidopodus</i> ...	Dr. M'Kinlay, R.N.
1 Lizard from Treasury Islands ...	Mrs. Wm. Harley.
2 Snakes from Fiji— <i>Platurus scutatus</i> ...	Mr. E. Warburton.
1 Vermicella annulata ...	Master Woolwich.
1 Death Adder— <i>Acanthophis antarctica</i> ...	Mr. W. Brooks.
1 Lizard— <i>Grammatophora</i> sp. ...	Mr. —
1 Lizard from Wagga ...	The Hon. Jas. Norton, M.L.C.
1 Death Adder— <i>Acanthophis antarctica</i> ...	Mr. C. S. Wilkinson.
1 Skin of Snake— <i>Aspidiotes ramsayi</i> ...	Mr. H. F. Kerton.
1 Red-naped Snake— <i>Brachysoma diadema</i> ...	Mr. G. A. Biebler.
1 Young Brown-banded Snake— <i>Hoplocephalus curtus</i> ...	Mr. M. H. Sampson.
1 Lizard— <i>Lialis punctatula</i> ...	Mr. W. Hinton.
1 Black Snake— <i>Pseudechis porphyriaceus</i> ...	Indian Commission, L.I.F.E.
1 Crocodile— <i>Crocodilus porosus</i> ...	Mr. H. P. Coop.
4 Turtles ...	Mr. G. Gromberg.
2 Eggs of <i>Crocodilus biporcatus</i> ...	Mr. Jas. Perry.
1 Whip-snake— <i>Diemenia olivacea</i> ...	Mr. N. R. Taylor.
1 Lizard— <i>Lialis punctatula</i> ...	Mr. Wm. Hancock.
1 " <i>Pygopus lepidopodus</i> ...	Mr. T. Birks.
1 Brown Snake— <i>Diemenia superciliosa</i> ...	Mr. Chas. Fraser.
1 Gecko— <i>Phyllurus inermis</i> ...	Mr. G. Saunders.
Do Do ...	Mr. A. Toby.
1 Snake— <i>Vermicella annulata</i> ...	Mr. King.
1 Lizard— <i>Cyclodus gigas</i> ...	Mr. F. P. Benzeville.
1 Small collection of Snakes, &c. ...	Mr. Page.
1 <i>Egernia cunninghamii</i> ...	
6 <i>Hoplocephalus</i> sp. ...	
2 " <i>ramsayi</i> ...	
1 <i>Diemenia superciliosa</i> ...	
1 Amphisbaenoid— <i>Typhlops</i> sp. ...	
<i>Fishes.</i>	
2 Flying Gurnet— <i>Trigla polyommata</i> ...	Lieutenant Colonel Raymond.
1 <i>Brama raii</i> ...	Mr. J. Want.
1 <i>Plesiops bleekeri</i> ...	Mr. W. H. Watson.
1 Young Ray— <i>Trygon</i> sp. ...	Mr. E. Cobcroft.
1 Mackerel— <i>Cybium commersonii</i> ...	
1 <i>Trachichthys jacksonensis</i> ...	
1 <i>Perca fluviatilis</i> ...	
1 Parrot Fish— <i>Pseudoscarus</i> sp. ...	Dr. J. C. Cox.
1 <i>Synaptura nigra</i> ...	
2 <i>Trachinus bailloni</i> ...	

Specimen.	Donor.
<i>Fishes—continued.</i>	
1 Tetrodon sp.	Mr. J. J. Josephson.
1 Box-fish—Ostracion sp.	Mr. E. Rice.
1 Shark—Heterodontus galeatus	Mr. Hemming.
1 Blenny sp.	Mr. J. Banks.
1 Stinging Ray—Urolophus testaceus	Mr. H. Prince.
1 Chætodon sp.	Dr. Eichler.
1 Phyllopteryx foliatus	Mr. J. R. Hamilton.
1 Chilodactylus vittatus	Mr. C. Teece.
1 Trachichthys jacksonensis....	Mr. W. Adams.
2 Young Sharks—Heterodontus phillipi	Mr. V. Whitbread.
1 Box-fish—Ostracion concatenatus	Mr. Freeman.
2 Pempheris macrolepis	Mr. A. P. Bryce.
Jaws of Pachymetopon grande	Mr. Ross.
1 Box-fish—Ostracion concatenatus	Mr. Yandel.
1 Ostracion concatenatus	Mr. Edwd. Geary.
1 Box-fish—Ostracion concatenatus	Mr. B. Paul.
1 Plesiops bleekeri	Mrs. Boyd.
1 Box-fish—Ostracion concatenatus	Mr. H. Newcombe.
1 Centropogon robustus	Mr. A. Corben.
1 Plesiops bleekeri	Capt. Braithwaite.
1 Box-fish—Ostracion concatenatus	Mr. Ross.
1 Crysticeps sp.	Mr. J. Rogerson.
1 Box-fish—Ostracion concatenatus	Dr. Luther, H.M.S. "Dart."
1 Monocentrus japonicus	Mr. F. Christensen.
1 Small Fish	President, New South Wales Fisheries Commission.
2 Fish	Capt. Wolsch.
1 Leather jacket—Monacanthus ayraudi	Dr. M'Kinlay, R.N.
1 Bait Fish—Antinarius sp.	Mr. Jas. Sullivan.
2 Fish—(in spirits) Elops sp.	Mr. Sommers.
1 Tail and part of back of Ray—Trygon pastinaca	Indian Commission, L.I.F.E.
Small collection of Fish	Mr. Neville Cayley.
Do do from Solomon Islands	Lient. Com. Crosse, R.N.
7 Fishes from Treasury Islands	Mr. H Newcombe.
1 Prionurus microlepidotus	Mr. G. L. Goodman.
Collection of Fish, 14 sp., 23 specimens	Mr. Jas. M'Coy.
Collection of dry specimens....	Mr. Smithurst.
Collection of 39 Fish	
1 Patecus sp....	
Collection of Fish	
1 Toad-fish—Tetrodon sp.	
1 Tetrodon sp.	
3 Solea microcephala	
1 Calionymus caulauropomus....	
1 Prionurus microlepidotus	
Flying-fish—Exocetus sp	
<i>Insecta.</i>	
1 Podocanthus viridis	Miss L. Palmer.
1 Caterpillar, Sphinx sp.	Mrs. Oglesby.
1 Phasma sp.	Mr. W. C. Tibbets.
1 Sphinx Moth Chærocampa scrofa....	Mr. J. Smith.
1 Extatostoma tiaratum	Mr. Charles Davis.
1 Cricket—Gryllus sp."	Mr. Horton.
1 Phasma sp.	Mr. Stein.
Moth and eggs	Mr. A. Bryce.
1 Sphinx Moth—Chærocampa scrofa	Mr. D. W. Wilson.
1 Moth, Chelepteryx collesi	Mr. Thos. Davis.
1 Phasma sp.	Mr. J. Stenning.
1 Extatostoma tiaratum	Mr. W. Lamrock.
1 Beetle—Cetonia sp.	Mr. W. Archbold.
1 Phasma sp.	Mr. W. Black.
1 Leech—Sanguiga sp.	Mr. P. B. Sely.
4 Butterflies—Venessa sp.	Mr. G. P. Mathew, R.N.
4 " Heteronympha sp.	
4 " Pyrameis gonerilla	
2 Argyrophenga antipodum....	Miss Gough.
1 Moth—Chelepteryx collesi	Mr. L. Lazarus.
1 Phasma sp.	Mr. H. Webb.
1 Beetle—Cetonia sp.	Mrs. Chalcott.
Moth and eggs	Capt. Braithwaite.
Collection of Insects....	Mr. John Wilde,
1 Elephant Beetle	

Specimen.	Donor.
<i>Insecta—continued.</i>	
1 Sphinx Moth— <i>Chœrcampa scrofa</i>	Mr. C. H. Fitzhardinge.
1 Mantis sp.	Mr. A. Armstrong.
1 Stick Insect male with wings— <i>Phasma</i> sp.	Miss Lucy Benson.
1 Caterpillar— <i>Sphinx</i> sp.	Mr. G. Hornshaw
2 Moths— <i>Cossus</i> sp....	Mr. A. J. Doust.
Small collection of Insects	Mr. J. Fisher.
1 Green Cricket— <i>Gryllus</i> sp.	Mr. C. H. Fitzhardinge.
1 Beetle— <i>Lamprima latreillei</i>	Mr. Selkirk.
1 " <i>Encara</i> sp....	Mr. Rodd.
1 <i>Cordiceps</i> sp.	Mr. E. Cobcroft.
Larvæ of <i>Chelepteryx collesi</i>	Mr. G. Hornshaw.
<i>Myriopoda and Arachnida.</i>	
1 Spider— <i>Mygale</i> sp.	Mr. B. Rodd.
1 " <i>Gasteracanthus</i> sp.	Mr. Mathews.
1 Centipede— <i>Heterostoma sulcidens</i>	Mr. Stainer.
1 Spider	Mr. A. P. Bryce.
1 Spider with worm— <i>Gordius aquaticus</i>	Mr. Shaw.
1 Spider	Mr. D. Fletcher.
1 Centipede— <i>Heterostoma sulcidens</i>	Mr. W. E. Shaw.
1 Spider— <i>Gasteracanthus</i> sp.	Mr. C. Braithwaite.
1 Spider— <i>Mygale</i> sp.	Mr. O. A. C. Boot.
Few Scorpions	Dr. H. P. Guppy, R.N.
2 Spiders and webs	Mr. H. Hazlewood.
2 Spiders' cells in clay— <i>Mygale</i> sp....	Mr. C. H. Fisher.
2 Centipedes— <i>Heterostoma</i> sp.	} Mr. J. Fisher.
A few Spiders and nest	
<i>Crustacea.</i>	
1 Crab— <i>Hyastenus diacanthus</i>	Mr. C. Saunders.
Small collection of Crustacea	Capt. Braithwaite.
1 Crayfish— <i>Astacopsis serrata</i>	Mr. E. S. Cox.
Hermit Crabs...	} Dr. H. B. Guppy, R.N.
1 <i>Pagurus</i> sp.	
2 <i>Cœnobita</i> sp.	
1 Crab— <i>Ranina dentata</i>	} Dr. J. C. Cox.
1 <i>Penaeus canaliculata</i>	
Small collection from New Caledonia	Mr. Smithurst.
<i>Mollusca.</i>	
A few Shells	} Mr. Cooper.
1 Octopus	
1 Cuttle-fish— <i>Sepia</i> sp., (very large)	
Eggs of Shell-fish	
Small collection of fresh-water shells	
1 Land Shell	
Small collection from New Caledonia	Mr. Smithurst.
<i>Echinodermata.</i>	
1 Cake Urchin— <i>Anthenea tuberculosa</i>	Mr. R. Redmayne.
Small collection of Echini (trawled)	Presidt. Fishs. Commis.
1 Sea egg— <i>Strongylocentrotus erythrogrammus</i>	Mr. J. M. Johnson.
1 Red Star-fish— <i>Asterias</i> sp.	Mr. B. Paul.
2 Sea Eggs	Mr. J. Brown.
1 <i>Heterocentrotus mammillatus</i>	Dr. Luther, R.N.
A few Echinoderms	Mr. J. Fisher.
1 Star-fish— <i>Asterias</i> sp.	Mr. W. Henning.
4 Specimens <i>Echinus darnleyensis</i>	Honorable Wm. Macleay.
1 Star-fish— <i>Linkia</i> sp.	Mr. Smith.
Small collection of Echinodermata from New Caledonia....	Mr. Smithurst.
<i>Zoophyta, Spongida, &c.</i>	
Small collection of Sponges....	} Presidt. Fishs. Commis.
" " of Corals	
" " of Hydroids	
1 Skeleton of sponge, dry	
1 Small collection " Corals from New Caledonia	Mr. Bloxsome. Mr. Ross. Mr. Smithurst.
<i>Geological Specimens.</i>	
1 Specimen	Mr. Cooper.
1 Piece of Copper Ore (Blue Carbonate)	Mr. F. Savage.
3 Specimens of Coal from coal borings	} Mr. G. F. Mathew, R.N.
1 " of Gypsum	
Fossil Shells from Coal Mine	

Specimen.	Donor.
<i>Geological Specimens—continued.</i>	
Nodules of Iron Sand Stone	Miss E. Selkirk.
A few Fossils—Spirafer sp.	Mr. J. Mitchell.
Fossils from New Caledonia	Mr. Duboisé.
Fossil remains from Bathurst District	Mr. J. Ainsworth.
3 pieces of Carbonate of Iron	Mr. J. M. Antill.
1 piece of Antimony Ore	
1 " of Crude Antimony	
1 Piece of Regulus Antimony	Mr. C. Hodson.
1 Specimen of Antimony Ore	
1 " of Glossopteris	
1 " of Phyllotheca	Mr. H. Smithurst.
Crystals of Quartz "Fiji Diamonds"	
1 Fossil Shell—Mœonia grandis	Mr. W. Martyn.
Fossils from Bathurst District	
" Macleay "	Mr. J. Fischer.
" Newcastle "	
Fossil Bone	Mr. H. Shaw.
Quartz from Macquarie River	
1 piece of Agate	Mr. J. White.
Specimens of Petrified Woods	
A few Fossils...	Mr. D. F. Jarrett.
Piece of Quartz	
2 Concretions of Freshwater Lobster	Sir Thos. M'Mullan.
1 4th Molar of Diprotodon...	Mr. C. A. Rudder.
4 Specimens of Fossil Plants—Lepidodendron sigilaria	Mr. Cooper.
1 Piece of Copper Ore—Argentiferous galena	
A collection of Rocks and Gold Specimens	Mr. E. J. Dunn.
Portion (of shaft of) Fossil Bone—probably Femur of Diprotodon	Mr. J. McDonald.
1 Copper Specimen	Mr. Daniel M'Donald.
2 Nodules of Iron Ore	Mrs. Selkirk.
<i>Ethnological Specimens, &c.</i>	
1 Leaf Plate composed of Banyan leaves (<i>Ficus indica</i>) used by Hindoos when partaking of food	Rev. A. Andrews.
Letters written on palm leaves	
Iron Stylus or Pen used in writing same	
Collection of Kanaka Weapons from New Caledonia	Mr. L. Joubert.
Skull of Aboriginal	Mr. Horsley.
1 Canoe from Solomon Islands	Messrs. Campbell Bros.
1 Necklace of human Teeth	
A Finger-strop used for throwing spears. New Caledonia	Mr. F. Ratte.
Specimens from Fiji	Mr. J. H. Renwick.
A Native Basket	Capt. Wolsch.
Specimens from New Guinea	Rev. W. Wayatt Gill.
50 pieces of Horn, showing the various stages through which it passes before it is the finished Comb	Mr. C. E. Wigzell.
Maori Chief's Club	Master A. J. Shearsby.
Girdle (tutau) from Buka-buka	
Stone Adze	Captain Wolsch.
4 Stone Tomahawks	
1 Coat of Armour and 3 Spears	Dr. Luther, R.N.
2 Stone Tomahawks	Mr. H. Shaw.
2 Coral Throwning-stones	Captain Braithwaite.
Collection of Specimens. New Hebrides, &c	
Ornamented Stone Adze	Dr. Mackay.
5 Clubs	
2 Casts of human heads	
2 Rocket Guns (flint lock)	Ordnance Dept. N. S. W.
2 Pistols	
3 Stone projectiles	
2 " Tomahawks	Mr. A. Chauffourier.
1 Flat stone for sharpening spears	
2 Stones of which Tomahawks are made	
1 Mask (shield)	Lieut. Commis. Crosse, R.N.
2 Head Stones	Miss Faithful.
Cranium of Welsh Aboriginal	Dr. H. B. Guppy, R.N.
Cocoa-nut showing marks of the Robber Crab (<i>Birgus latro</i>)	Mr. A. Smith.
Copy of Sydney Gazette, July, 22nd, 1820	
2 Bushman's poisoned Arrows	Mr. W. II. Orchard.
1 Necklace	
2 Soap-stone Pipes	Sir Alfred Stephen, C.B., G.C.M.G., &c.
1 Stone Tomahawk	

Specimen.	Donor.

APPENDIX XI.

To the Trustees of the Australian Museum.

Gentlemen,

I have the honor to inform you that, immediately on my arrival in London, I reported myself to the Agent-General (The Hon. Sir Saul Samuel, K.C.M.G.), the Executive Commissioner for the Great International Fisheries Exhibition. Then, proceeding to the British Museum, I called on Dr. Gunther, and made arrangements for the great sunfish and seal to be stuffed and mounted, on behalf of the British Museum, to be handed over to that institution at the close of the Exhibition. The birds I made arrangements with Mr. E. Gerrard, junr., to have stuffed and mounted. I also called on Messrs. Powell, and ordered the necessary extra bottles required, and on Sage & Co. with respect to the cases, and to the Customs *re* white spirits. The whole of my attention was then devoted to making the necessary arrangements, along with Sir Saul Samuel, for the fitting-up and decorating of the New South Wales Court, and other minor details, preparing descriptive labels, &c., for the specimens.

Our exhibits arrived at the Exhibition grounds, and were in due time displayed, although not without some delay, the chief drawbacks being in the fitting up and decoration of the Court, which necessarily took some time before it was finally finished.

Whenever a lull in the work occurred I took advantage to visit the various museums, botanical, and zoological gardens, &c., in the neighbourhood of London.

By the opening day most of the collections were on view ; and from time to time, as the various exhibits came to hand, they were displayed in Sage's cases.

After the Court was finished, my time was devoted to the various Juries on which I had the honor to serve ; and to attending the numerous lectures given by experts in the building, under the patronage of His Royal Highness the Prince of Wales, of which complete copies will be found among the books and publications I bring back ; also in examining the numerous exhibits, and making arrangements for exchanges with the Commissioners and Representatives of the various Courts.

Finding that it was impossible to get a catalogue of our exhibits ready in time for the opening day, I wrote out and had printed descriptive labels for the most important of them, and afterwards catalogued, in detail, the whole of the exhibits in our Court, giving a few explanatory remarks wherever it appeared necessary. The greater part of this catalogue—that pertaining to the exhibits of fishes—the Commission did us the honor to reprint on its own account in London, for distribution with the Conference papers and essays already alluded to.

As I could not well leave the Exhibition before it closed, I was prevented from visiting any but the metropolitan museums and institutions until I had completed my duties to the Fisheries Commission ; and I regret to say so much time was taken up in receiving the numerous exchanges previously arranged, and in labelling, listing, and packing them up, as well as superintending the packing of our numerous and important purchases and return goods, that I found myself with very little time at my disposal for visiting the Continental museums, &c. Nevertheless, by always travelling at night, I managed to visit the most important of the museums, aquaria, and zoological gardens, both in Great Britain and on the Continent. My chief object at these institutions was to gain information respecting the various methods of curing, and preparing and mounting specimens for museum purposes ; also in the modes of exhibiting the same, and the most improved styles of cases and cabinets, keys, locks, fastenings, &c. Most of my time among the metropolitan museums was spent at those of the Science and Art, and the zoological museums at South Kensington. I received a hearty welcome from the Directors of those institutions, and was allowed every opportunity of examining the grand national collections there preserved at my leisure, without any formalities.

At the British Museum I had opportunities of examining many of the types of Australian fauna of the old naturalists, and the important series of Australian and New Zealand fossils. From this museum also I secured casts of many important and unique fossils and other specimens mentioned hereafter in the Appendix.

My attention was also given to the various methods of setting out and exhibiting the different classes of animals in the show-cases, and the arrangements made for easy and quick access to the type and reference collections.

Among the other metropolitan museums I visited were those of the Royal College of Surgeons, where I found a most admirable method of bleaching discoloured bones, and numerous elegant methods of mounting spirit preparations ; the Museum of Natural History, "School of Mines," Germyn-street, famous for its palaeontological and mineral collections ; the Royal Institution, Albemarle-street, chiefly chemistry, for popular lectures, large library ; the University of London, an examining body only for first-class in Arts and Sciences.

In the Booth Museum, situated near Brighton, are some of the most naturally and artistically mounted groups of birds to be met with.

To

To Edinburgh I paid two visits, and chiefly devoted my time to the Science and Art Museum ; and to the Edinburgh University Museums, under the direction of Professor Archer, F.R.S.E., and Professor Wm. Turner, M.B., F.R.S., &c., to whom, with Dr. Murie, I am indebted for much valuable information and many acts of kindness. The new Anatomical Museum was not completed at the time of my visits, but from what I could see of its construction and internal fittings, it will be one of the most efficient and best fitted-up buildings of its kind in Great Britain. A fine collection of ziphood whales, some of great rarity, were of particular interest, especially a perfect skeleton of that rare species known as Rudolphe's Whale, of which I had also the good fortune to secure a specimen in the flesh before leaving London, which formed the subject of a recent memoir by Professor Flower.

I also visited the museums at Glasgow, Paisley, Dundee, Perth, St. Andrew's, and others, and made various exchanges, as set out in detail in the Appendices.

At Paris I was chiefly interested in examining the relics of the old collections made by the early French voyagers to the South Seas. These interested me very much, especially an Emu (*Dromais ater*, Vieillot), from Baudin's expedition—shot at Port Jackson—probably the first specimen brought to Europe. The immense collections there were quite bewildering, and, from a scientific stand-point, too vast to attempt anything more than a cursory view in the time at my disposal, so, as in other museums, I fell back on the methods of mounting, and the exhibition and arrangement of the collections for the public. Although I do not admire the French style of mounting or exhibition, no one could go through so great a Natural History institution without learning much which will hereafter be useful.

The entomological, palaeontological, and geological collections were too vast to be realized by any but an expert. Those of Castelnau (*insects*) will be found of great interest to the Australian. The treasures of some recent deep-sea dredgings were displayed in a separate building erected for the purpose. Here were vast collections of sponges, &c. (*Askonema*, *Aphrocallistes*, &c.), and deep-sea forms of curious fishes, obtained during the voyage of the "Talisman." Diagrams of the most remarkable, in some instances enlarged, were hung on the walls, and descriptive labels of distinguishing colours attached to the most important; glass of different tints was used for displaying semi-transparent or light-coloured specimens in spirits, the numbers punched out in the parchment labels; glass floats were used for suspending small specimens in bottles.

After visiting the various zoological and ethnographical museums, laboratories, and lecture-rooms, I devoted considerable time to the new museum buildings now being erected for the zoological collections in the Jardin des Plantes Museum. One wing only was near completion—an immense oblong structure with galleries all round inside, supported by pillars from first and second floors, giving a maximum amount of clear space for the arrangement and distribution of the cases; the galleries were reached by a common stair from a vestibule at the end of the structure, not from the inside.

I also visited the various botanical and zoological gardens, parks, &c., in the vicinity of Paris, and notably the Trocadero and its aquarium, and beautifully laid-out surroundings.

Before leaving, I made the usual arrangements for mutual exchanges with the Museum authorities.

At Amsterdam the Zoological Gardens were the chief attraction, and the collection there is one of the best in Europe. Visited the museums and libraries. The aquarium here is one of the few I found in good working order; of this I obtained plans, &c., which were duly forwarded to the Board.

The museum of Japanese works and ethnological collection is very extensive and unique; the chief objects of interest being the ethnological collections, zoological museum, library, collection of insects and shells, and the museum of "Invertebrated animals." There are many separate buildings scattered over a large open space, beautifully laid out, in connection with the Zoological Gardens in which they are placed.

At Hanover I visited the zoological gardens, aquarium, and museum; all were on a very small scale, and exhibited no particular feature of interest.

At Bremen I had ample opportunity of examining the collections in the zoological museum, through the kindness of Dr. Finsch, late Director or Curator of that institution. Took note of the arrangements of the cases and stuffing of the birds, &c., &c., which were much better than those usually displayed in continental museums. The cases, with blinds, were placed at right angles to the walls as in other museums, with windows to the floor in the interspaces, so as to get all the light possible. Here group-labels are used, and blocks containing the genus name placed at the beginning of each species.

The corals are mounted on polished stands, upright, and the crustacea similarly placed on wires in stands, on which the names are printed; the Echinodermata in a similar way. This was the case in most continental museums. I still prefer the English method; and types liable to fade should never be exposed to the light, even though protected by blinds.

I also examined here the large ethnological collections, recently made by Dr. Finsch, in Micronesia and Polynesia. They include a large number of weapons, &c., as well as numerous casts of the heads, faces, and busts, taken from life from typical individuals of the different islands. Arrangements were made to secure a complete set for the Museum.

The museums of Leyden and Berlin were visited chiefly with the view of seeing the grand collections made by the old naturalists. Between them, these museums contain the bulk of the collections of Cuvier and Valenciennes, of Bloch and Pallas—now over 100 years old; also those of Erbenberg, Temmink, Erichson (*insects*), Leichenstein, Cabanis, Boddaert, Rudolphi, Finsch, Bleeker, &c. In Berlin I saw Dr. Peters' grand collection of reptiles, frogs, and bats, and Von Martin's Echinodermata. Large collections of birds and mammals, and extensive osteological collections were in both museums. The cases at Berlin were among the best I had seen out of England, and wherever possible placed at right angles to the walls, with open bays between them; the windows down to the floor, so as to obtain the greatest amount of light. This method is the one now universally adopted in English and European museums. The methods of mounting and exhibiting the specimens vary very little.

The fish markets and aquaria were also visited. The salmon, trout, carp, tench, and eels are kept alive in tanks, and as selected sold to the public, at prices varying from 1s. to 6s. per lb., according to the species and supply on hand.

At Brussels I made arrangements with the museum authorities for exchanges of casts of their magnificent fossils—this museum being celebrated for the grand collections of Cetacean and Reptilian remains of extinct animals.

The museum at Utrecht is connected with the University; the collections are arranged for teaching purposes in large class-rooms for students, and consist chiefly of invertebrates. One of Loewenhoek's

hock's microscopes, or rather lenses—the most primitive and simple contrivance that can be well imagined, but by which *Infusoria* were first discovered (about 1675) in a drop of water—was an object of great interest.

At Florence, under the direction of Professor Giglioli, is one of the best arranged museums in Europe—the collections are in first-class order, and clearly and well exhibited. There is a grand collection of Italian vertebrates, the most extensive in Europe, while nearly all the other families of vertebrates and invertebrates are well represented by typical forms. It contains some hundreds of models of human anatomy for the use of students, as well as a grand ethnological collection. The astronomical and other instruments of Galileo, and his finger, cut off by the Romans, are among its most interesting relics.

I remained for about a week at Naples, visiting daily the zoological station and aquarium, where, through the courtesy of Dr. Dorhn, the Director, I was enabled to obtain much valuable information as to the working of the station, and the most approved and recent methods of curing and preserving spirit specimens. The aquarium here is undoubtedly the best in the world, and the only one which can be looked upon as a decided success from a scientific point of view; it is admirably arranged, and every facility was given me by Dr. Dorhn for seeing the working and maintenance of the large collections exhibited there. Plans and full details of its construction have been already laid before the Board.

With respect to the aquaria, as I have before mentioned, although I visited those of Edinburgh, Brighton, London on several occasions, and those of the International Fisheries Exhibition almost every day for over a period of five months, I found very little in either arrangement or management likely to be of use to us in Australia. On the Continent, those of Paris, Hamburg, Sweden, Berlin, Amsterdam, and others were visited; they all resemble each other in the main points, but those of Amsterdam and Naples are the most important, and of these I have already laid before the Board plans and specifications in detail. With such a harbour as that of Port Jackson and our beautifully clear and pure water, with a fall and rise of the tide of from 5 to 6 feet, none of the expensive machinery used in other countries is required, and a beautiful and useful establishment of this kind could be erected at Lady Macquarie's Chair, opposite Garden Island, in the Inner Domain, at a comparatively trifling cost.

Finally, I may mention that at each and every museum I visited, whether private or public, I made satisfactory arrangements for mutual exchanges; many of these exchanges I brought out with me, or sent them on before I left England, and since my return many others have arrived; these will be found enumerated in the various Appendices.

The large and valuable additions will speak for themselves, and show what success I met with during my tour.

I have, &c.,

ED. P. RAMSAY,
Curator.

APPENDIX No. I.

PRESENTED BY THE INDIAN COMMISSION, THROUGH DR. DAY.

1 Monacanthus chinensis.	1 Equula edentula.
1 Ostracion nasus.	1 Chorinemus orientalis.
1 Chatocessus chacunda.	1 Osteogeniosus.
1 Lates calcarifer.	1 Chærops.
1 Serranus salmoides.	1 Spyraena.
1 Triacanthus strigilifer.	1 Belone.

Fishes—continued.

1 Mugil.	2 <i>Plotosus canius.</i>
1 <i>Cheilinus.</i>	1 <i>Muraenesox cinereus.</i>
1 <i>Caranx.</i>	2 <i>Trichiurus.</i>
1 <i>Glypheidodon coelestinus.</i>	1 <i>Pristigaster.</i>
1 <i>Platycephalus.</i>	1 <i>Engraulis.</i>
3 <i>Engraulis commersonianus.</i>	2 <i>Dussumiera acuta.</i>
1 <i>Anabas scandens.</i>	1 <i>Sillago sihama.</i>
1 <i>Cynoglossus elongatus.</i>	2 <i>Caranx rottleri.</i>
1 <i>Pristipoma hasta.</i>	1 " <i>djeddaba.</i>
1 <i>Equula.</i>	1 <i>Belone.</i>
1 <i>Caranx.</i>	1 <i>Chirocentrus dorab.</i>
1 <i>Mugil.</i>	1 <i>Anguilla sidat.</i>
2 <i>Apogonichthys gracilis.</i>	1 <i>Carcharias.</i>
1 <i>Barbus.</i>	1 <i>Clarias melanoderma.</i>

Mollusca.

3 <i>Soligo</i> sp.	2 <i>Holothurea maxima.</i>
---------------------	-----------------------------

Crustacea.

10 <i>Teneus</i> sp.	2 <i>Palinurus.</i>
----------------------	---------------------

Collection of Crabs.

9 species.	16 specimens.
1 King crab, <i>Limulus</i> sp.	

FROM THE NEWFOUNDLAND COMMISSION. (*Exchange.*)*Fishes.*

52 <i>Ammodytes americanus.</i>	1 <i>Anguilla bostoniensis.</i>
4 <i>Gadus aeglefinus.</i>	5 <i>Clupea harengus.</i>
12 " <i>morhua.</i>	2 <i>Cottus groenlandicus.</i>
1 <i>Phycis americanus.</i>	1 <i>Ctenolabrus burgall.</i>
18 <i>Salmo fontinalis.</i>	8 <i>Gasterosteus biaculeatus.</i>
4 " <i>sp.</i>	3 <i>Scomber scomber.</i>
9 <i>Mallotus villosus.</i>	1 <i>Acanthias vulgaris.</i>
6 <i>Osmerus viridescens.</i>	4 <i>Zoarces anguillaris.</i>
	24 <i>Clupea harengus</i> , from Labrador.

Canadian Fishes.

1 <i>Salmo salar.</i>	5 <i>Pomotis auritus.</i>
8 " <i>fontinalis.</i>	3 <i>Corvina oscula.</i>
2 " <i>sp.</i>	2 <i>Perca fluviatilis.</i>
1 <i>Coregonus</i> sp.	1 <i>Catostomus aureolus.</i>
5 <i>Labrax lineatus.</i>	1 <i>Lucioperca americana.</i>
1 <i>Esox lucius.</i>	1 <i>Sargus.</i>
1 <i>Serranus.</i>	1 <i>Amiurus catus.</i>
2 <i>Clupea.</i>	

— PEAL, ESQ. (*Exchange.*)*Bird.*1 *Heron, Nycticorax*, sp. (*Bahamas*).

Collection of named British Bryozoa.

Zoophytes.

5 <i>Gorgonias</i> sp.	1 <i>Meandrina</i> , large specimen.
1 <i>Madrepora muricata</i> ,	large specimen.

*Echini.*2 *Neoma grandis.*

Collection of Fossil Echini, from the Chalk, England.

PUBLIC MUSEUM, LIVERPOOL (THOS. MOORE, ESQ.) (*Exchange.*)Scutes of *Labarinthodon*.

CHINA COMMISSION (MR. NIEUMANN.)

*Fish.*1 *Shark, Heterodontus zebra.*

MR. GROOM-NAPIER.

Minerals, Fossils, &c.

1 Fossil fish.	1 Model of the "Hargreaves' nugget."
1 <i>Lapis lazuli.</i>	3 Models of diamonds.
1 Rock salt.	4 Crystals of topaz.

Dr.

DR. DAY'S PRIVATE COLLECTION, AS EXHIBITED AT THE INTERNATIONAL FISHERIES EXHIBITION, LONDON, 1883.
 Specimens of Fish from India and the Indian Ocean purchased, from Deputy Surgeon-General Francis Day, F.L.S., F.Z.S.,
 including duplicates of his Type species and Co-types from Dr. Bleeker's Collection.)
 "Co-type" signifies that the specimens were admitted by Dr. Bleeker as identical with his types. "Type," that these are certified to by Dr. Day
 being part of his original collection, and named by him.

[*Supplement to the Australian Museum Report for 1884.*]

1885.

NEW SOUTH WALES.

TECHNOLOGICAL, INDUSTRIAL, AND SANITARY MUSEUM.

(REPORT OF THE COMMITTEE OF MANAGEMENT FOR 1884.)

Presented to Parliament, pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCE THE GOVERNOR AND EXECUTIVE COUNCIL.

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this the Fifth Annual Report of the Committee of Management of the Technological, Industrial, and Sanitary Museum.

1. The business of the Museum has been conducted by the same Committee as in the previous year, namely, Sir Alfred Roberts, M.R.C.S., E. (Chairman); Professor Liversidge, F.R.S.; and Mr. Robert Hunt, F.G.S., Deputy-Master of the Mint.

2. The Museum has continued open (in the afternoon only) during the whole of the year 1884. The total number of visitors for the year has been 57,197 (Sundays 26,128 and week-days 31,069). The largest Sunday attendance was on August 17th, when 1,273 persons passed the turnstile. On December 26th the number of visitors was 606, being the largest number for a week-day. An examination of Appendix II shows that the attendance is increasing month by month, and the Committee does not doubt that this increase will be much more marked as the Museum becomes better known.

3. The Museum is still situated in the Agricultural Hall, Outer Domain, which is rapidly becoming inadequate for the purpose. It is hoped that, during the coming year, additional accommodation for the valuable and rapidly increasing collections may be provided. Apart from the question of size, the Committee would respectfully urge that the present Museum premises are unsuitable in other respects, notwithstanding the liberal manner in which the Government has been pleased to sanction improvements to the structure, which have been suggested by the Committee.

Provision has been made for a night watchman, and every precaution is taken with the view to prevent an outbreak of fire.

4. The total number of specimens acquired during the year is 5,395. Numerous exhibits of value have been presented to the Museum, and several gentlemen have lent valuable specimens. Of the purchases acquired by the Committee, special attention may be invited to a collection of 80 large models of furnaces, &c.; a comprehensive series of constructive materials subjected to various stresses; and a large number of casts, in plaster of Paris and fictile ivory, of specimens of art workmanship in some of the principal European Museums. The locomotive which was the first to run in New South Wales is now in the Museum, and its interest will of course be enhanced as time goes on.

5. Since September 24th popular descriptions of the contents of the Museum have been given by the Curator every Wednesday afternoon. The interest taken by visitors in these explanatory discourses (which are further illustrated by experiments wherever possible), has been so marked that it is contemplated to continue them regularly.

6. The Committee begs to add to this its Report the following Appendices:—

- I.—Balance-sheet for the year ending 31st December, 1884.
- II.—Attendance of visitors.
- III.—List of specimens purchased.
- IV.—List of specimens presented.
- V.—List of articles lent.
- VI.—List of books purchased.
- VII.—List of books, periodicals, &c., presented.
- VIII.—List of diagrams, maps, photographs, &c., purchased.
- IX.—List of diagrams, maps, photographs, &c., presented.
- X.—List of articles received in exchange.
- XI.—List of articles sent away in exchange.

The Common Seal of the Museum is affixed by order of the Board, this
11th day of February, 1885.

(l.s.) A. LIVERSIDGE, } Members
of
(l.s.) ROBERT HUNT, } Committee.
(l.s.) ALFRED STEPHEN,
Crown Trustee.

J. H. MAIDEN,
Curator and Secretary.

APPENDIX III.

PURCHASES (Specimens).

When received.	Description of Exhibit.		
1884.			
25 January	...	Twenty-five specimens of limestones, sandstones, and conglomerates, &c., from Germany, Italy, Austria, and Russia.	
29 "	...	(1) A collection of forty kinds of Italian alabasters, in rectangular blocks. A number of alabaster sculptures in the form of vases, animals, leaves, &c. (2) A collection of twenty-two kinds of fruit sculptured in Carrara marble and artistically coloured. (3) A very complete collection of miscellaneous educational appliances, maps, diagrams, models, and educational publications, as used in the schools of Italy and Germany.	
23 February	...	Small herbarium of forest trees. Collection of twenty-eight fruits of forest trees. Fifty-two small specimens of European woods. Grass herbarium (100 large specimens). Grass herbarium (50 small specimens). Two small herbaria of economic plants (140 specimens). Imitations of gems and precious stones. Twenty-five geometrical models in glass. Specimens of the various races of silkworms (in glass case). Series to illustrate the life history of the honey-bee. Complete series of specimens to illustrate the following manufactures:—Linen, cotton, wool, silk, leather, paper, glass, iron and steel. Model of loom. A collection of raw products and manufactured articles used in heating and lighting. A collection of dye-wares, and fabrics treated with them. Object-lesson cabinet of raw products of animal, vegetable, and mineral origin (250 specimens).	
28 "	...	Herbarium of 100 specimens of medicinal plants, &c. Do. do. forage plants. Do. do. meadow grasses. Do. do. plants useful in agriculture. Do. do. plants injurious to agriculture.	
18 March	...	A collection of 100 ornamental stones, polished. A collection of silk-producing moths (eleven species). A comprehensive exhibit to illustrate the paraffin industry as carried on by the Young's Paraffin Light Co. (Glasgow), including cannel coal, samples of solid paraffin of every degree of purity, and a trophy of candles, also samples of mineral oils and of all the by-products formed.	
21 "	...	Forty-five specimens of minerals containing iron. Seventeen do. do. lead. Twenty-five do. do. copper. Also a large number of other ores of metals. 121 specimens of gems and precious stones.	

APPENDIX III—*continued.*

PURCHASES.

When received.	Description of Exhibit.
1884.	
21 March ...	A collection of thirty-five combustible minerals. Collection of fifty minerals used in the preparation of miscellaneous chemical compounds. Collections of fifty-two minerals and rocks used as pigments and for optical purposes. Stones used in building construction (350 specimens). A collection to show the optical properties of minerals (twenty-five specimens). Do. do. cleavage (twenty-five specimens). Do. arranged in order of specific gravity (twenty-five specimens). Do. do. melting points (seven specimens).
13 May ...	Tested specimens to illustrate the mechanical properties of the kinds and qualities of structural materials mentioned below, viz.:— Steel bars, plates, forgings, tubes, angles, rails. Wrought-iron bars, plates. Copper alloys, steel and iron wires. Cements, granites, sandstones. English and American oaks, pines, &c. The above have been tested under the following stresses:—Pulling, thrusting, twisting, bending, bulging, and shearing. This is a most valuable collection, and one of especial interest to architects, engineers, &c.
14 " ...	Nine large models to scale of the following:— Roasting furnace for arsenical ores. Large puddling furnace with double Siemens' gas-regenerator. Furnace for distilling zinc (Journal of the German Engineering Association, 1872, vol. I.) Furnace for smelting zinc ores (Mitscherlich). Quicksilver furnace (Prechtel). Copper-refining hearth (or small German hearth), according to Percy. Furnace for making English crown glass (Karmarsch). Porcelain oven. Periodical oven for lime-burning.
12 June ...	New South Wales furs, skins, viz.:—Dingo, kangaroo, opossum, native cat, wallaby, &c.; also skin of carpet snake, emu eggs, pearl shells, &c.
21 " ...	Seventy-six marble slabs, 20 inches square, 1 inch thick, with polished faces and names incised and gilt. From Italy, France, Belgium, Germany, &c.
25 July ...	A large number of casts in plaster of Paris and fictile ivory, of important works of art in several of the principal European Museums. The collection includes reliquaries, candlesticks, processional crosses, crucifixes, pastoral staffs, book covers, salvers, medallions, ewers, caskets, ciboria, censers, knockers, sword-hilts, shields, a large number of beautiful panels, a provisorium, a lettner, a mirror frame, a number of specimens of early Gothic church ornament, &c., &c.
9 September ...	Photographs of works of art. Especial notice is invited to some magnificent candelabra, and to reproductions of portions of the celebrated oak ceiling (which dates from the 16th century) in the castle of Jever, belonging to the Grand Dukes of Oldenburg.
17 "	Miscellaneous specimens, including terra cotta medallions, Japanese cloisonné enamelled vases, model of catamaran from Ceylon, gnus' and elephants' tails from South Africa, embroidered silk dress from Greece, numerous samples of ancient Greek pottery, &c., &c.
3 October ...	A collection of about 170 specimens consisting of vegetable substances used in pharmacy, dyeing, &c., and rare chemicals.
15 "	A number of Chinese articles, including opium and tobacco pipes, weighing and calculating apparatus, musical instruments, &c.
27 "	Japanese and Chinese porcelain vases, old Japanese bronzes, and grotesque wood carving, serpentine tazza, Australian boomerang and waddy, &c. Set of small models of appliances for catching fish. Thirty models of ploughs of various nations. Set of small models of agricultural implements for children's object lessons. A series of specimens to illustrate various methods of budding and grafting. A collection of fifty mineral fertilizing substances. Small herbarium of forest trees. Grass herbarium, consisting of 300 large specimens beautifully mounted. A collection of thirty ornamental woods, polished. A series of specimens (preserved in spirits) to illustrate the anatomy of the silk-worm. Models (greatly enlarged) in papier maché of the following:—Male and female silk-worm moths; gooseberry; mulberry; strawberry; and ten models illustrating natural orders of plants. Set of models of celebrated diamonds.
14 November ...	"Musée Dorangeon," consisting of twelve object lesson cards, with specimens affixed. Pituri (the masticatory of the Australian aborigines), in semi-circular bag, obtained at Mount Margaret Station, on the Wilson River, South-west Queensland.

APPENDIX III—*continued.*

PURCHASES.

When received.	Description of Exhibit.
1884.	
26 November ..	A collection of Huddersfield and Halifax manufactures, consisting of damasks and table coverings, arranged in album form.
3 December ..	Hemispherical cast-iron bowl, used for cooking purposes in China, also Chinese hoe, and a book of paintings of Chinese mythology (on rice paper).
29 ..	A valuable and important collection of large models of machinery, furnaces, &c., of wood and metal. Each is carefully constructed to scale. Watts' beam steam-engine, with condenser, pumps, and regulator. Morgan's paddle-wheel (four movable paddles). Buchan's paddle-wheel. Oldham's paddle-wheel. Over-shot wheel, of wood, according to Weinbach. Under-shot wheel, of wood and iron. Daelen's steam-hammer. Roasting furnace, according to Scheerer. Nasmyth's steam-hammer. Swedish roasting furnace for iron ores, according to Scheerer. Roasting furnace for iron ores, with cylindro-conical shaft, according to Scheerer. Furnace, with Siemens' regenerator. Mansfield double roasting furnace, according to Scheerer. Puddling furnace, according to Scheerer. Double refining fire with heating furnace, according to Karsten. Single refining fire, according to Karsten. Double refining oven (hearth) for iron. Furnace for refining iron, according to Karsten. Refining furnace, according to Karsten. Flowing furnace, with closed breast. Sump furnace, with open breast. Siegerland blasting furnace. "Spectacles" furnace, according to Scheerer. Rachett's smelting furnace for copper ores. Smelting furnace for lead ores. Double Saiger furnace. German cupelling furnace for lead ores containing silver, according to Scheerer. Furnace for copper ores. Crucible furnace, with open breast, for the treatment of copper, silver, and other ores, according to Scheerer. Large cupola furnace, according to Weibe. Cupola furnace, with cast-iron shell. Furnace for founder. Double crucible furnace for brass-foundries. Furnace for heating boiler-plates, according to Weibe. Do. lead ores, according to Karsten. Do. heating plates, according to Karsten. Sheet-glass furnace, according to Dumas. Furnace for annealing glass, according to Karmarsch. Large channel kiln for bricks. Kiln for bricks, with three furnaces. Do. with six furnaces. Hoffmann's circular kiln. Lime-kiln, with several fires. Belgian continuous lime-kiln. Potter's furnace. Models to show charcoal-burning from logs. Oven for making wood charcoal, according to Karsten. Coke oven. Tar-kiln. Baker's single oven for wood fuel. Heating apparatus for a brewer's copper. Malt-kiln. Stephenson's link-motion. Gooch's link-motion.

APPENDIX IV.
DONATIONS (Specimens).

Date.	Articles received.	Name of Donor.
1884.		
4 Jan. ...	A collection of seeds of grasses, &c.; vegetables, &c. (about seventy specimens).	Mr. F. T. Sharp, Sydney.
5 „ „	A large and comprehensive exhibit of articles manufactured by the Company, consisting of grates, stoves, ovens, stall, stable-fittings, &c.; sink-traps, cast-iron pots, &c., &c. Also, samples of coal, limestone, iron ores, &c., from the Company's mines.	The Carron Co., Falkirk, N.B., through David Cowan, Esq., Manager.
7 „ „	Agar-agar, a preparation from sea-weed ...	Mr. Emil Paterson, C.E.
8 „ „	A valuable collection of economic botany specimens, including North American timbers; articles made out of Japanese woods; barks and fibres; and substances used as spices and in pharmacy.	The Director, Royal Botanic Gardens, Kew, London.
14 „ „	Model of the patent tram-rail of M. Victor Demerbe, of Jemappes, Belgium.	Messrs. Ostermeyer, Dewez, & Co. (Limited), Sydney.
15 „ „	Case containing a series of specimens illustrating all the stages in the manufacture of needles.	Messrs. Henry Milward & Sons, Redditch, England.
	Case containing a series of specimens illustrating all the stages in the manufacture of sea and fresh water fish-hooks.	Do.
	Case containing a series of specimens illustrating all the stages in the manufacture of steel pens, together with samples of various steel pens.	Messrs. Joseph Gillott & Sons, Victoria Works, Birmingham.
21 „ „	An extensive and valuable collection of specimens of economic geology, consisting of foreign rocks (110), Victorian rocks (70), and minerals (150).	The Trustees of the Public Library, Museums, and National Gallery of Victoria.
24 „ „	Samples of fossil nuts found under the basalt in the workings of the Great Extended Gold-mining Company's claim at Forest Reefs, New South Wales.	Mr. J. M. Smith, Sydney.
28 „ „	Sample of stream tin ...	Mr. Arthur Stacey, Sydney.
30 „ „	An exhibit in show-case, complete, showing all the stages in the manufacture of sewing-needles. (With illustrated explanatory text.)	Messrs. Lewis, Wright, & Baylis, Redditch, through Mr. James Wilson, Sydney.
7 Feb. ...	Samples of batteries, wires, insulators, &c., as used in the Italian telegraphic service; together with a collection of official publications.	The Director-General of Telegraphs, Rome.
9 „ „	Specimens of barks, fibres, gums, resins, &c. ...	The Director, Botanic Gardens, Melbourne.
12 „ „	Seven large specimens illustrative of the metallurgy of copper from the ore, through all stages of treatment to the ingot ready for the market, from the Nymagee Copper-mine, Nymagee, New South Wales.	Mr. George Hardie, Sydney.
	One sample of high-class hogget wool ...	Messrs. Shanahan & Jennings, Garrawella Station, Liverpool Plains, New South Wales, through Wool-classers' Association of New South Wales, Liverpool.
	Five samples of high-class wool from stud-ewes. Five samples of high-class wool from stud-rams.	A. Lucian Faithfull, Esq., Goulburn, through the Wool-classers' Association.
14 „ „	Specimens from the South Sea Islands:—Four spears armed with barbs of human bone, vegetable ivory-nuts, candle-nuts, &c.	Mr. J. E. M. Russell, Sydney.
20 „ „	Model of Archimedean screw ventilator ...	Mr. W. J. Clampett, Sydney.
22 „ „	Two bags made of split screw-pine leaves (<i>Pandanus odoratissimus</i>).	Mr. J. E. M. Russell.
29 „ „	Large model of tram-car, embodying suggested improvements; also models of two kinds of tram-rails designed for use on New South Wales tramways. (Designed and made by donor.)	Mr. Thomas Earley, Glebe, near Sydney.
6 Mar. ...	Twenty-four assorted specimens of high-class wool ...	Messrs. W. & T. C. Dickson, Yarrawen, Brewarrina, New South Wales, through the Wool-classers' Association of New South Wales.
10 „ „	Three large blocks of kerosene shale (Torbanite), from near Mittagong, New South Wales.	Australian Kerosene Oil and Mineral Co., Joadja Creek.
12 „ „	Sample of tin-ore from the Black Swamp, New England, New South Wales.	Mr. J. Reed, Sydney.

APPENDIX IV—*continued.*
DONATIONS.

Date.	Articles received.	Name of Donor.
1884.		
20 Mar. ...	A large number of samples of fractured bar-iron (L. & N. W. R. O. brand), including round, square, and flat bars of various qualities, chain and rivet iron, tire and horse-shoe iron, &c., &c.	The Right Honorable the Earl of Dudley, K.G., through his Agent, Mr. E. Fisher Smith, Dudley.
8 May ...	Locomotive Engine, No. 1—the first engine to run on a line in New South Wales. This engine, built by Messrs. R. Stephenson & Son, arrived in Sydney in January, 1855. It commenced running in May of that year, and ended its service in May, 1877, after having run 383,636 miles. The rails upon which the engine is standing in the Museum are two of the original "Barlow" rails laid on the line between Sydney and Parramatta.	The Commissioner for Railways, Sydney.
10 „ ...	A carefully selected collection of specimens to illustrate the metallurgy of antimony, as carried on at Corangula. The collection includes samples of the ores and products of each operation.	Mr. E. H. Becke, Corangula, near Kempsey, N.S.W.
	Two large frames, containing numerous samples of Messrs. Bartleet's manufactures, including needles of all kinds, fish-hooks, lines, floats, artificial bait, &c., also a series of specimens to illustrate the manufacture of a needle.	Messrs. W. Bartleet & Sons, Red-ditch.
13 „ ...	Two models of patent pianoforte mechanism (Messrs. Brinsmead and Sons), viz., "Simplex check action" and "Perfect check repeater action."	Messrs. J. Brinsmead & Sons, London.
14 „ ...	Piece of fossilized wood from New Zealand	Mr. John Fagan, Sydney.
	Two ancient coins (Greek), found at Kustingie, on the Black Sea.	Mr. Wm. Forbes, Sydney.
	An exhibit of cocoons and raw silk, and of manufactured silk twist, in show-case complete.	Mr. C. A. Rickards, Leeds, through Mr. James Wilson, Sydney.
22 „ ...	Twenty-five specimens of Ceylon timbers	Professor Liversidge, F.R.S.
23 „ ...	An exhibit of damasks, brocades, silk and woollen fringes, woollen trimmings, silk cords, tassels, &c., also samples of mirror and plate glass, &c.	Messrs. Solei, Hebert, & Co., Genoa, through Messrs. Moro & Co., Sydney.
29 „ ...	Series to illustrate all the stages in the manufacture of various kinds of combs, as under, viz., side, braid, and dressing combs (white and stained); showing the horn in its various stages up to the finished article.	Mr. C. E. Wigzell, Sydney.
18 June ...	Trawl net and gear, made by Knowles & Knowles, of Hull. Exhibited at the London Fisheries Exhibition of 1883. Length of beam, 45 feet; length of net, 85 feet. Used by vessels of 70 tons register in the North Sea fisheries.	The Commissioners for Fisheries of New South Wales.
21 „ ...	Sample of wool which caught fire spontaneously on board ship at Brisbane, November, 1878.	Mr. Henry Small, Sydney.
	Miscellaneous articles from the South Sea Islands, India, Solomon Islands, &c., e.g., fishing-rods and hooks, bottle-gourd, walking-sticks, &c.	Mr. John Fagan, Sydney.
24 „ ...	Sample of rock from San Christoval, Solomon Islands, also sample of moss from River Earn, Perthshire, Scotland.	Mr. E. P. Ramsay, Australian Museum.
28 „ ...	One bronze Chinese coin	Mr. W. Burrows, Sydney.
5 July ...	Two small specimens of fossil wood from Bundanoon, N.S.W.	Mr. P. Lorking, Sydney.
	Sample of tapa cloth (Fiji), Queensland beans, and Indian silver coins.	Mr. John Fagan, Sydney.
9 „ ...	Piece of antimony ore (N.S.W.)	Mr. John Mitchell, Bowning.
11 „ ...	Rock and mineral specimens (about fifty) from Bowning, near Yass, N.S.W.	Mr. John Fagan.
13 „ ...	Sample of crude tortoiseshell from Fiji	Mr. E. P. Ramsay, Australian Museum.
15 „ ...	Lichen (corallloid) from basaltic rocks in New Zealand	The Baron Ferd. von Mueller, K.C.M.G., F.R.S., Melbourne.
22 „ ...	Specimens of timbers from Victoria, New South Wales, Queensland, and Tasmania. (Forty-two specimens.)	Mr. J. Archibald, Curator of the Museum, Warrnambool, Victoria.
23 „ ...	Piece of fringe taken from a bed, in Knowlton Hall, Kent, said to have been occupied by Queen Elizabeth, circa 1570.	The Honourable W. H. Marsh, Colonial Secretary, Hongkong.
	Three Hongkong silver coins, of the value respectively of 20, 10, and 5 cents.	

APPENDIX IV—continued.

DONATIONS.

Date.	Articles received.	Name of Donor.
1884.		
1 August	Samples of Italian olive oils, olives, sauces, and wine...	Messrs. Moro & Co., Genoa and Sydney.
2 „ „	Show-case containing samples of the manufactures of the International Bandage Company, of Schaffhausen, Switzerland, comprising bandages of all descriptions, ligatures, &c.	Mr. Fred. Pluss, Consul for Switzerland at Sydney.
	Six live plants of the native tamarind (<i>Diploglottis Cunninghamii</i>) from South Queensland.	
11 „ „	Cast of armorial bearings (Royal Arms of Denmark)	Mr. F. M. Bailey, F.L.S., Colonial Botanist, Brisbane.
15 „ „	An exhibit of New South Wales merino wool, yarn, and woollen manufactures, comprising tweeds, buckskins, checks, twills, hair-cords, indigoes, cricketing and native brown tweeds (without dye), as shown at the Calcutta International Exhibition	Mr. Samuel Bowles, Sydney.
19 „ „	An exhibit prepared at the Government Railway Workshops, Sydney, by Mr. C. Icke, and shown at the Calcutta Exhibition, consisting of antimony ores and metal, phosphor-bronze slide valves, annealed couplings, &c.	The New South Wales Commissioners for the Calcutta International Exhibition.
25 „ „	Sample of pig-iron, which in passing through the cupola furnace had the interior of the bar melted out, leaving an outer shell.	The Commissioner for Railways, through the New South Wales Commissioners for the Calcutta Exhibition.
27 „ „	Cylinder, split, with cap cut off. To complete an exhibit to illustrate the manufacture of sheet glass presented to the Museum by this firm.	Mr. John Owens, Sydney.
9 Sept. „	Two small paintings on Parian marble, by Lansa, of the Acropolis and Parthenon at Athens.	Messrs. Chance Bros., Birmingham.
25 „ „	Ten samples of fine and heavy combing wools, from stud sheep bred by donor.	Sir Edward Strickland, K.C.B.
3 Oct. „	Jar of brown glazed ware, in form of pig ...	Mr. G. Clark, East Talgai, Hendon, Queensland.
	Two specimens of wood from the north coast of Tasmania (<i>Alyxia buxifolia</i>).	Sir Alfred Roberts.
27 „ „	A valuable collection of American and Indian Cinchona and Cuprea barks. This collection consists of thirty-four choice and carefully selected specimens, accompanied by the fullest particulars.	Professor Liversidge, F.R.S.
5 Nov. „	Piece of glass (½" thick), broken by hailstones at Omaha, June, 1871.	Messrs. Thos. Whiffen & Co., London, through Mr. A. H. Whiffen, Sydney.
10 „ „	One small charcoal filter...	Mr. James Stockdale, Omaha, Nebraska, U.S.A.
23 „ „	Five bronze coins (Indian) ...	Mr. John Fagan.
25 „ „	Incrustations on steam boiler ...	Do.
	Six samples of teas from China, Japan, and Ceylon ...	Do.
3 Dec. „	A collection of thirty-five samples of aniline dyes, also specimens of wool and silk yarns dyed with the same. A collection of compounds to illustrate the chemistry of these dyes.	Messrs. Griffiths Bros., Melbourne and Sydney.
	Nickel-plated cooking vessels, and other articles ...	Herr K. Oehler Offenbach, Germany, through Mr. C. L. Sahl, Consul-General for Germany, Sydney.
	Samples of ultramarine from the Blaufarbenwerk, Marienberg, Bensheim.	Herren Heitmann & Witte, Iserlohn, Germany, through Mr. C. L. Sahl.
	Thirty-three hoes of various kinds, used by different nations.	Through Mr. C. L. Sahl.
4 „ „	Four fleeces of high-class wool: one of two-year old wether, three of hoggets. Wool all of twelve months' growth.	The Manager, Wittener Walzwerk Witten a/d Ruhr, Westphalia, through Mr. C. L. Sahl.
17 „ „	An exhibit of Aligarh (Bengal) pottery, consisting of articles in black, grey, and red ware, e.g., vases, tea-sets, jugs, Pilgrim bottles, water-bottles, plates, &c.	Messrs. Shanahan & Jennings, Garrawella, Liverpool Plains, through the Wool-classers' Association of New South Wales, Liverpool.
24 „ „	Samples of wool of merino rams, two of which received 3rd prize at the Northern Agricultural Society's Show, Tasmania.	The New South Wales Commissioners for the Calcutta Exhibition, 1884.
	Samples of wool of stud ewes of the Burenda flock ...	Mr. William Gatenby, Woodbourne, Tasmania.
		Mr. M. Hood, Burenda, Mitchell, Queensland.

APPENDIX V.

LOANS.

When received.	Exhibit.	Name of Lender.
1884. 1 Feb. ...	Model (mounted on a table 12' x 6') showing proposed wharfage improvements in Sydney, according to the prize design of Mr. Oscar Schultz, C.E.	The Wharfage Improvement Association, Sydney.
1 May ...	Chemical earthenware, including :—still-head, worm, arms, connectors, receivers, taps, funnels, acid jug, store-jars, plumbago crucibles, &c. Sanitary and domestic appliances, including :—patent manganese filters in various styles, traps, gullies, drain-pipes, closet-pans, hand-pressed bricks for various purposes, &c.	Messrs. Doulton & Co., Lambeth, London.
22 „ ...	Large agate seal (silver gilt mount), large agate bowl, also writing set of original Wedgwood jasper ware with enamelled floral decoration.	Professor Liversidge, F.R.S.
3 June ... 26 July ...	Samples of ornamental glass-ware One complete set of Tyers' block signalling telegraph apparatus for absolute or permissive block-working of railway traffic. (Sending and receiving apparatus.)	Mr. F. T. Sharp, Sydney. Mr. W. M'D. Courtney, C.E., Sydney.
22 Oct. ...	Fifteen frames of historical art studies, comprising designs from Japanese, Chinese, Persian, Indian, and Italian pottery, metal work, &c.	Mr. Arthur D. Riley, Sydney.

APPENDIX VI.

PURCHASES (Books).

Agriculture.

- Library No.
- 564 Artificial Manures. (Ville, translated by Crookes.)
